Medication-Assisted Treatment
Buprenorphine Waiver Training

#treataddictionOK

8 am - 5:30 pm Saturday, August 27, 2016

Location
Embassy Suites Downtown/Medical Center
741 N Phillips Ave
Oklahoma City, OK

Who
This course is open to any licensed medical professional who is interested in prescribing buprenorphine. You must stay the entire eight hours to qualify for a waiver. A sign-in/sign-out will be required.

Cost
The course is free of charge to registrants.

Lunch
Lunch will be provided free of charge and is sponsored by the Oklahoma State Medical Association, the American College of Osteopathic Family Physicians Oklahoma Society and the Osteopathic Founders Foundation.

Registration
Register online at http://bit.do/mat2016 by August 19, 2016. Questions? Contact Justina Andonian at 401-524-3076 or justina@aaap.org.

About the course
Nearly 80% of opioid-addicted persons do not receive treatment for their addiction because of limited treatment capacity, financial obstacles, social stigma and other barriers to care. This course will provide training and clinical mentorship to practicing physicians and physicians-in-training who wish to include office-based treatment of opioid dependence in their practices.

Medication-assisted treatments are more effective than alternatives such as detoxification and offered "drug-free" rehabilitation. However, one of the barriers to implementing medication-assisted treatments is the limited knowledge and experience among Oklahoma prescribers in how to safely use medications and manage opioid dependence.

This course is being provided by the American Academy of Addiction Psychiatry (AAAP) and the American Osteopathic Academy of Addiction Medicine (AOAAM) with the intention to train clinicians about the effectiveness of medication used for treating opioid addiction in order to more effectively address this public health crisis and is designed for those who have the intention to prescribe buprenorphine.

Accreditation Statement
The Oklahoma Osteopathic Association is accredited by the American Osteopathic Association to provide osteopathic continuing medical education for physicians. The OOA designates this program for a maximum of 8 AOA Category 1-A credits and will report CME and specialty credits commensurate with the extent of the physician's participation in this activity. Application for CME credit has been filed with the American Academy of Family Physicians. Determination of credit is pending. AAFP Prescribed credit is accepted by the American Medical Association as equivalent to AMA PRA Category 1 Credit™ toward the AMA Physician's Recognition Award. When applying for the AMA PRA, Prescribed credit earned must be reported as Prescribed credit, not as Category 1.
