Assistive Technology for
Children and Youth with Disabilities
IDEA Part B

Oklahoma State Department of Education
2500 North Lincoln Boulevard
Oklahoma City, OK 73105
Phone: 405-522-3248 www.ok.gov/sde

It is the policy of the Oklahoma State Department of Education (OSDE) not to discriminate on the basis of race, color, religion, gender, national origin, age, or disability in its programs or employment practices as required by Title VI and VII of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, and Section 504 of the Rehabilitation Act of 1973.

Civil rights compliance inquiries related to the OSDE may be directed to the Affirmative Action Officer, Room 111, 2500 North Lincoln Boulevard, Oklahoma City, Oklahoma 73105-4599, telephone number (405) 522-4930; or, the United States Department of Education's Assistant Secretary for Civil Rights. Inquiries or concerns regarding compliance with Title IX by local school districts should be presented to the local school district Title IX coordinator.

This document was created in collaboration with Oklahoma Assistive Technology Center and Oklahoma ABLE Tech. Revised October 2013.

Purpose

The purpose of this document is to assist Oklahoma Local Education Agencies (LEAs) and Individualized Education Program (IEP) teams in providing assistive technology devices and services to students with disabilities as required by the Individuals with Disabilities Education Act (IDEA). The document includes information and resources related to all components of the assistive technology service delivery process.

Assistive Technology in Public Schools

Many students' lives today are filled with technology that gives them mobile access to information and resources 24/7, enables them to create multimedia content and share it with the world, and allows them to participate in online social networks where people from all over the world share ideas, collaborate, and learn new things. Outside school, students are free to pursue their passions in their own way and at their own pace. The opportunities are limitless, borderless, and instantaneous.

The challenge for our education system is to leverage the learning sciences and modern technology to create engaging, relevant, and personalized learning experiences for all learners that mirror students' daily lives and the reality of their futures. In contrast to traditional classroom instruction, this requires that we put students at the center and empower them to take control of their own learning. . . . By supporting student learning in areas that are of real concern or particular interest to them, personalized learning adds to its relevance, inspiring higher levels of motivation and achievement.

In addition, technology provides access to more learning resources than are available in classrooms and connections to a wider set of "educators," including teachers, parents, experts, and mentors outside the classroom. On-demand learning is now within reach, supporting learning that is life-long and life-wide (Bransford et al., 2006).

Arne Duncan

U.S. Department of Education
National Education Technology Plan 2010

IDEA and Assistive Technology

The federal regulations for implementation of the Individuals with Disabilities Education Improvement Act (IDEA) define assistive technology (AT) devices and services^{1, 2}. Assistive technology is technology used by individuals with disabilities in order to perform functions that might otherwise be difficult or impossible.

IDEA requires Individualized Education Program (IEP) teams to consider the assistive technology needs of students during the development, review, and revision of an IEP³. IDEA also requires schools to provide AT if it is needed for a student to receive a free appropriate public education (FAPE). FAPE can include a variety of services such as special education, related services, supplementary aids and services, program modifications or support for school personnel. AT, just like all other components of FAPE, must be provided at no cost to parents. Local Education Agencies (LEAs) must provide or pay for any AT necessary to ensure FAPE, either directly or through contract or other arrangements. The schools may not unnecessarily delay the provision of AT devices and services due to funding issues if a child requires the devices and services to benefit from the IEP^{4, 5}.

See Appendix A for Federal Regulations.

Quality Indicators for Assistive Technology

When determining the assistive technology needs of a student with a disability, it is important for LEA teams to provide high-quality, assistive technology services. The Quality Indicators for Assistive Technology (QIAT) were developed by focus groups, validated through research, and provide a set of descriptors that can serve as a guideline for LEAs to evaluate the quality of their AT services. These indicators are broken down into eight areas that are important to the development and delivery of assistive technology services and include:

- | | |
|-------------------------------|---------------------------------------|
| (1) Consideration of AT Needs | (5) Evaluation of Effectiveness of AT |
| (2) Assessment of AT Needs | (6) AT in Transition |
| (3) AT in the IEP | (7) Administrative Support for AT |
| (4) AT Implementation | (8) AT Professional Development |

A set of self-assessment matrices have been developed as a companion piece to the Quality Indicators intent statements for each area. School districts can use the Quality Indicators for Assistive Technology to assist in the development and/or critique of district level policies and procedures which are in alignment with the mandates and expectations of federal and state law. In most instances the Quality Indicators are also appropriate for the consideration of AT for students who qualify for services under other legislation (e.g. Section 504 of the Rehabilitation Act, Americans with Disabilities Act).

See Appendix C for Quality Indicators of Assistive Technology Resources.

AT Consideration

Assistive technology must be considered for every student with a disability during the development, review, and revision of the IEP¹. This includes the Initial, Interim, Subsequent, Amended, and Modified IEP or when a team member deems it necessary.

34 CFR §300. 24(a)(2) Development, Review, and Revision of IEP

(2) Consideration of Special Factors.

“The IEP Team shall — (v) Consider whether the child needs assistive technology devices and services.”

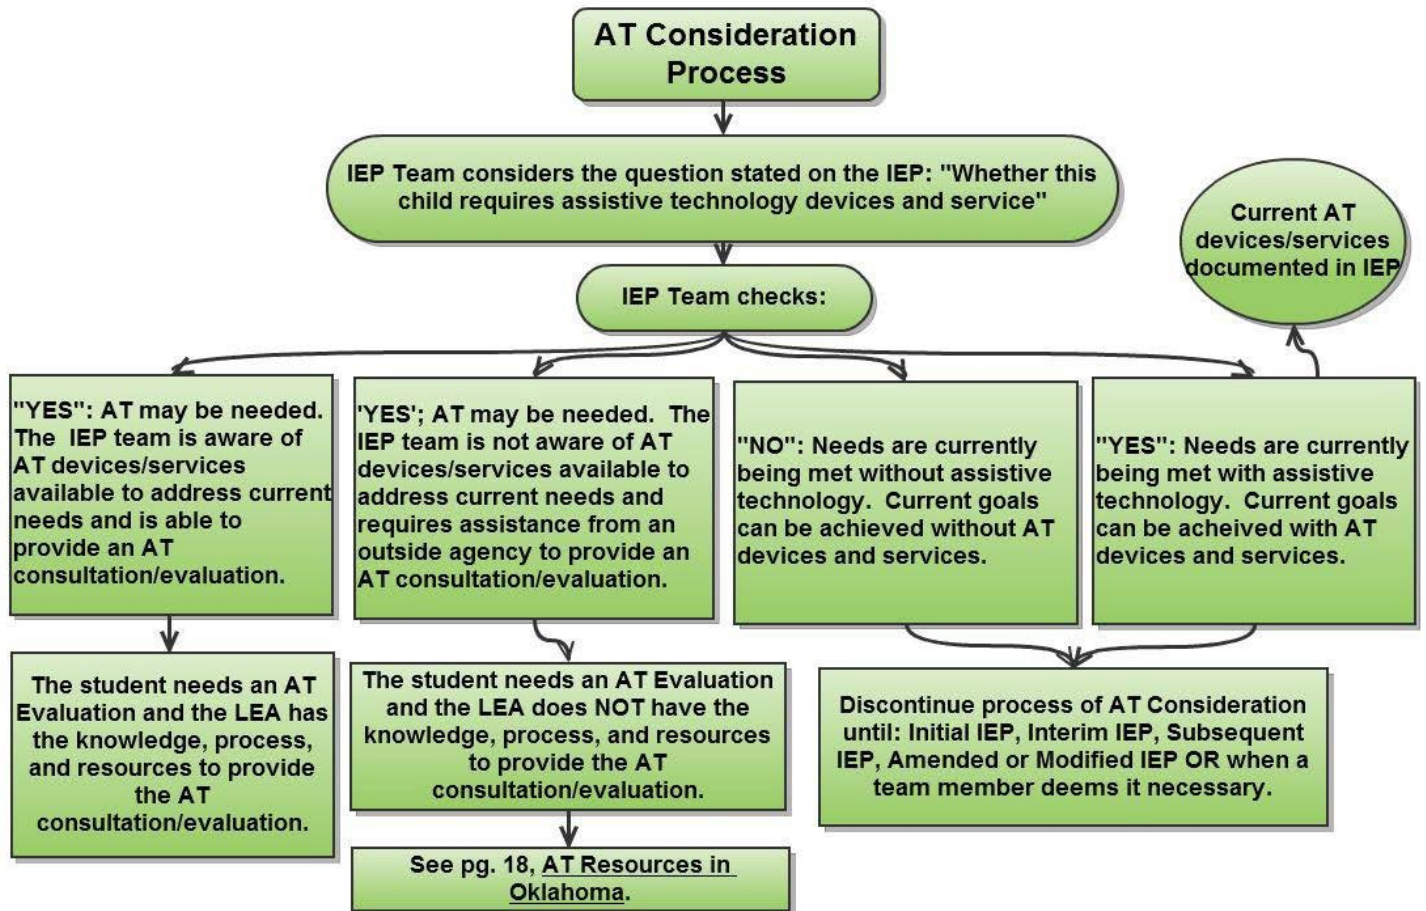

The Congressional intent of this section of IDEA is to emphasize assistive technology as a means to support educational achievements. The law requires that the IEP team consider a student’s need for assistive technology devices and services during the IEP process and places the decision-making responsibility with the IEP team.

The following are important to note as teams are completing the consideration process:

- IDEA does not provide specific guidance for how AT consideration should be conducted by a Local Education Agency (LEA).
- The process of considering whether or not a student needs assistive technology devices and/or services should be brief as compared to the assessment process.
- At least one person on the IEP team should have some knowledge about assistive technology.
- The bulk of the student’s IEP Strengths, Needs, and Annual Goals and Short Term Objectives should be completed prior to considering potential assistive technology needs the student may have in order to reach their educational goals and objectives.
- The QIAT Consideration of AT document provides additional information to guide the IEP team through this process.

Page 3 includes a flow chart for the AT Consideration Process and provides guiding questions for determining a student’s need for AT.

See Appendices B and C for Consideration Resources.

AT Consideration Questions

The following questions may help the IEP team through the process of reaching a “Yes” or “No” answer to the question, “...whether the child needs assistive technology devices and services.”

- What educational tasks do we expect the student to complete that he/she isn’t able to do because of his/her disability?
- Are there concerns about the students' ability to complete educational tasks as indicated in the IEP?
- Are there educational tasks that the student is not being asked to attempt because of his/her disability in which assistive technology may be helpful? For example; Because the student has a reading disability and reads 2 levels below their actual grade, the student has modifications to shorten reading assignments. Is there assistive technology that could allow the student to access complete reading assignments?
- What strategies, modifications, accommodations, or assistive technologies have been tried in the past or are currently in use to help the student complete educational tasks?
 - Are any of them working?
 - Are there things that worked in the past that need to be reconsidered?
 - Are there things that have not been tried that need to be introduced?
- Does the student need assistive technology to access instructional materials (e.g., textbooks, worksheets) and/or to access general technology used by other students (e.g., computers in the computer lab)?

See Appendices B and C for Consideration Resources.

AT Assessment

The processes for “Consideration” and “Assessment” are different.

The most obvious differences between Consideration and Assessment are those of depth and duration. Consideration is a short discussion that takes place during the IEP meeting using known information and results in the decision to continue something already being used or to try or not to try assistive technology. Assessment goes into much more detail, looking closely at the student’s abilities and difficulties and the demands of the environments and tasks. Assessment also includes the acquisition of new information.

Assessing Students’ Needs for Assistive Technology
5th Edition, June 2009. Wisconsin Assistive Technology Initiative

¹ 34 CFR §300.5 Assistive Technology Device

“Assistive technology device means any item, piece of equipment, or product system, whether acquired commercially off the shelf, modified, or customized, that is used to increase, maintain, or improve the functional capabilities of a child with a disability. The term does not include a medical device that is surgically implanted, or the replacement of such device.”

² 34 CFR §300.6 Assistive Technology Service

“Assistive technology service means any service that directly assists a child with a disability in the selection, acquisition, or use of an assistive technology device. The term includes:

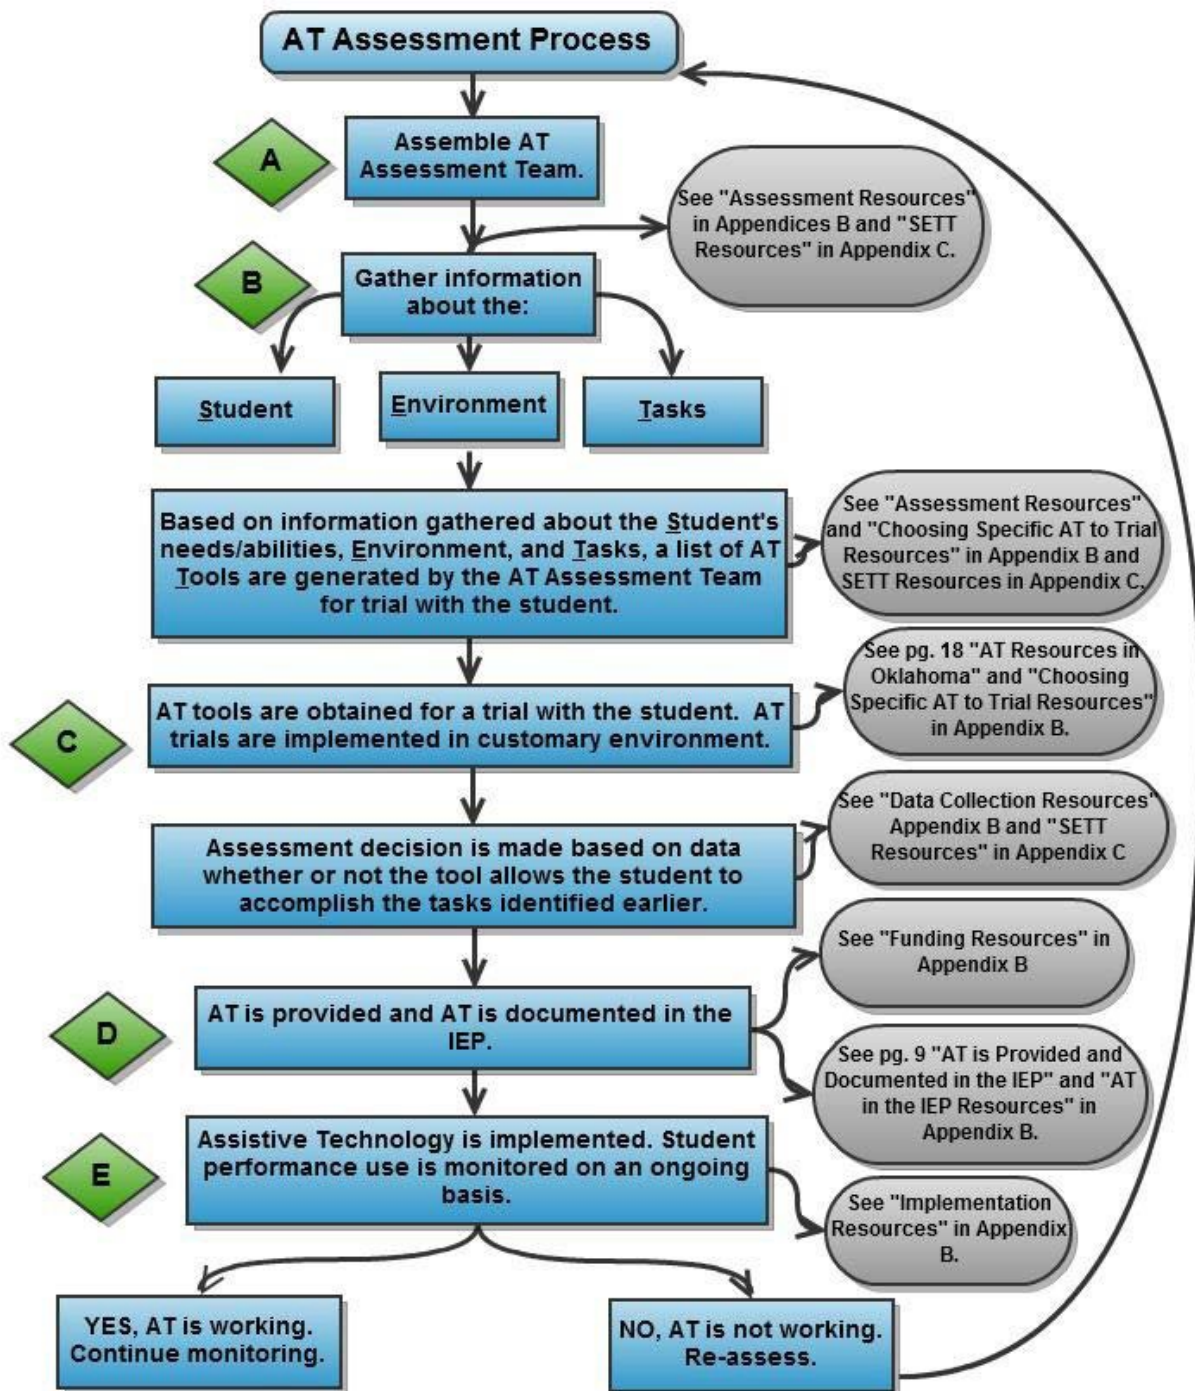

- (a) The evaluation of the needs of a child with a disability, including a functional evaluation of the child in the child’s customary environment;*
- (b) Purchasing, leasing, or otherwise providing for the acquisition of assistive technology devices by children with disabilities;*
- (c) Selecting, designing, fitting, customizing, adapting, applying, maintaining, repairing, or replacing assistive technology devices;*
- (d) Coordinating and using other therapies, interventions, or services with assistive technology devices, such as those associated with existing education and rehabilitation plans and programs;*
- (e) Training or technical assistance for a child with a disability or, if appropriate, that child’s family; and,*
- (f) Training or technical assistance for professionals (including individuals providing education or rehabilitation services), employers, or other individuals who provide services to, employ, or are otherwise substantially involved in the major life functions of that child.”*

The following are important to note as teams are completing the assessment process:

- Unlike other educational assessments, an assistive technology assessment is not completed with the administration of one test during a singular event.
- Assistive technology assessment is ongoing and should be a continual part of the student’s educational planning.
- Assistive technology assessments are conducted within the student’s customary educational setting by a multidisciplinary team knowledgeable about assistive technology devices and services.
- The QIAT Assessment of AT Needs document provides additional information to guide the IEP team through this process.

Page 5 includes a flow chart for the AT Assessment Process and provides guiding information and resources for each step of the process.

See Appendices B and C for Assessment Resources.

AT Assessment Process

AT Assessment is a **process** driven by identifying specific needs of the individual and matching an AT device and/or service to help that individual complete a task. AT assessment is not standardized, but should:

- Be systematic - LEAs have identified a systematic approach that everyone follows.
- Be replicable - LEAs should document the AT assessment process and tools used to conduct individual student assessments. This not only provides a roadmap of how the IEP team arrived at its AT assessment decision but allows another IEP team to replicate the results if needed.
- Provide accountability - LEAs will want proof that a piece of AT works before following through with funding.
- Be performed by a team familiar with AT populations and issues - LEAs need to ensure that LEA team members are knowledgeable to make decisions by receiving the appropriate training.

See Appendices B and C for Assessment Resources.

AT Assessment Process

Assemble AT Assessment Team

The Assistive Technology assessment team may or may not have the same members as the student's IEP team. The function of an AT assessment team is to develop a shared understanding of the student, the educational environments in which the student regularly participates, and the tasks that the student is expected to be able to complete and/or participate in as an active member of his/her educational environment. The AT assessment team should be able to provide specific information about the Student, Environment, and Tasks. In addition the AT assessment team should be a multidisciplinary team, and at least one member should have a working knowledge of assistive technology.

The following is a list of team members who potentially may have a role in the AT assessment process:

1. The Student
2. The Family
3. The Classroom Teacher
4. Instructional Assistants
5. School Psychologist
6. Speech-Language Pathologist
7. Occupational Therapist
8. Physical Therapist
9. Supplemental Service Teachers
10. Orientation and Mobility Specialist
11. Audiologist
12. School Nurse
13. Physician
14. Other Medical Personnel
15. Low Vision Specialist
16. Vocational Counselor/Case Manager
17. School Administrators/Special Education Supervisors
18. School Technology Contact
19. Assistive Technology Specialist
20. Assistive Technology Provider
21. Rehabilitation Engineer

AT Assessment Process, Continued

Gather Information about the Student, Environments, Tasks, and Tools

The following are techniques team members may utilize when gathering information:

- Observations - Observe the student in his/her natural settings in various activities. Note the participation patterns of peers. Collect work samples of the student and peers (as available) to compare the student's performance with what is expected of others in the classroom.
- Interactions - Interact with the student. Engage him/her in tasks similar to what is required in the classroom. Create opportunities for the student to try assistive technology and/or modifications that might be helpful.
- Interviews - Ask the student, family, and/or school personnel specific questions for information regarding needs, abilities, interests, and participation patterns of the student.
- Record Review - Review past history, medical, or specialized assessment information that may provide insight on the student.

The SETT Framework (Joy Smiley Zabala, Ed. D., ATP) is a systematic process that LEAs may use to conduct an AT assessment. "SETT" is an acronym that stands for: Student, Environment, Tasks, and Tools. The SETT Framework assists teams in exploring and recording information about each of the following areas:

The Student:

- What is(are) the functional area(s) of concern? What does the student need to be able to do that is difficult or impossible to do independently at this time?
- Special needs (related to area of concern)
- Current abilities (related to area of concern)
- Expectations and concerns
- Interests and preferences

The Environments:

- Arrangement (instructional, physical)
- Support (available to both the student and the staff)
- Materials and Equipment (commonly used by others in the environments)
- Access Issues (technological, physical, instructional)
- Attitudes and Expectations (staff, family, other)

The Tasks:

- What SPECIFIC tasks occur in the student's natural environments that enable progress toward mastery of IEP goals and objectives?
- What SPECIFIC tasks are required for active involvement in identified environments (related to communication, instruction, participation, productivity, and environmental control)?

The Tools:

Teams explore tools after information gathered on the S.E.T. is analyzed and used to address the following questions and activities.

- Is it expected that the student will not be able to make reasonable progress toward educational goals without assistive technology devices and services?
- If yes, describe what a useful system of supports, devices, and services for the student would be like if there were such a system of Tools.
- Brainstorm specific Tools that could be included in a system that addresses student needs.
- Select the most promising Tools for trials in the natural environments.
- Plan the specifics of the trial (expected changes, when/how tools will be used, cues, etc.)
- Collect data on effectiveness.

See Appendix B for Assessment Resources and the SETT Framework.

AT Assessment Process, Continued

Trial Device(s), Collect Data and Make a Decision

Trial Device(s)

Based on information gathered about the Student's needs/abilities, Environments, and Tasks, a list of AT Tools is generated by the AT Assessment Team for trial with the student. To prepare for a trial with an AT device, the IEP team should:

- Identify who is going to coordinate the trial which could include: obtaining the device, scheduling training, monitoring progress, etc.
- Include training for the student and applicable team members on how to use the AT.
- Identify a start and finish date for the trial.
- Identify criteria to determine whether or not the trial was successful.
- Have a process for collecting and reviewing data with the IEP team.

Where to Get AT Devices for Trial

- The LEAs AT inventory
- Visit device manufacturers' websites for information about trials and local sales representatives
- Oklahoma also has three state-specific resources for obtaining trials with AT devices:
 1. AIM Center at the Oklahoma Library for the Blind and Physically Handicapped
www.library.state.ok.us/aim/
 2. Oklahoma ABLE Tech: Oklahoma's statewide Assistive Technology Act Program
www.ok.gov/abletech/

See Appendix B for Choosing Specific AT to Trial Resources.

Collect Data and Make a Decision

The IEP team will need to collect data about each device trial to provide objective information about student performance and to help the team make a decision about which AT device(s) are appropriate for the student. There are a variety of data collection tools that can be used to document a student's progress during an AT device trial.

See Appendix B for Data Collection Resources.

After completing trials and collecting data, the team should know which device(s) will meet the student's needs. If more than one device meets the same need, the team may need to consider additional questions to select the best device.

- Will a no- or low-tech solution work just as well as a high tech solution?
- Will the technology work in all necessary settings or environments?
- If it will be moved regularly, how portable is it?
- How easy is it to learn and operate?
- How reliable is it under school and / or home conditions?
- Does it need to work with other technologies?
- Are there sufficient technical resources available at the school or district level to support the technology?

AT Assessment Process, Continued

AT is Provided and Documented in the IEP

AT is Provided

The LEA is responsible for making sure the needed AT is provided at no cost to the student and family. Depending on the type of AT required, there are many funding sources available to the student including Medicaid, private insurances, and additional private sources.

The following are actions that are necessary to obtain the recommended AT devices:

1. Identify source of equipment and costs.
 - a. Locate vendor or manufacturer.
 - b. Obtain a price quote in writing.
2. Identify possible funding sources.
 - a. Determine person(s) who will seek funding sources.
 - b. Determine requirement for each funding source.
3. Order equipment.
4. Plan for training as needed.
5. Set up equipment.
6. Establish technical support system.

AT is Documented in the IEP

Documenting AT in the IEP ensures there is a clear understanding of the AT devices and services that are needed for the student as identified by the IEP team.

When the IEP team recommends an AT device as part of the IEP, a brand name of the specific device does not have to be listed on the IEP. It may be more beneficial to list the needed device features (as more than one specific device may work).

The following are areas of the student's special education program in which AT devices and services may be included⁴:

1. Special Education
2. Related Services
3. Supplementary Aids and Services

AT as Special Education

When assistive technology is included as Special Education on the IEP, the team will incorporate it into the annual goals and/or short term objectives. How AT will contribute to achieving the goal and objectives must be clearly stated. The inclusion of AT in the IEP requires an explanation of how and why the child will use the technology to accomplish a particular goal. The device could be part of the conditions needed to accomplish the goal and objectives.

IEP Examples: Goals and Objectives

Using a word processing program on a computer with a spell checker, Dillon will make satisfactory passing grades in the fourth-grade general curriculum for language arts.

(IEP - Goals Page)

AT Assessment Process, Continued

AT as Supplementary Aids and Services

AT can be a supplementary aid or service to facilitate a student's participation in a general education class or other appropriate education setting. Students with disabilities have the right to an education in the least restrictive environment. To be successful in the least restrictive environment and to benefit from their education, students may need supplementary aids and services. Supplementary aids, which may allow a student to successfully participate in a general education class or other education-related setting, include a variety of assistive devices that compensate for disability and allow the student to perform the required tasks.

AT is necessary as a supplementary aid and service if its use (along with other necessary aids) supports the student sufficiently to succeed in the current educational placement, and in the absence of the aid, requires the student's removal to a more restrictive setting.

IEP Examples: Supplementary Aids and Services

Maggie will make oral presentations and participate in class discussions using an appropriately programmed speech generating device.

(IEP - Services Page)

Under the IDEA, a student must be receiving special education to receive related services. However, under Section 504 of the Rehabilitation Act of 1973 the student may receive auxiliary services without qualifying for special education. Some examples of auxiliary aids and services include:

- note taking device
- digital/audio texts
- TV enlargers
- Braille calculators, printers, or typewriters
- closed caption decoders
- specialized gym equipment
- assistive listening devices
- voice synthesizers
- telecommunications devices
- interpreter

AT as Related Service

The IDEA requires that special education and related services be made available to all children and youth with disabilities². School districts may provide students with disabilities AT devices and services in conjunction with other related services. School districts must provide related services to a student with a disability at no cost to the parent.

For students to be successful with AT devices, they need to receive training on the use of the equipment. For example, training to use a computer, an augmentative communication device, or large print viewer, can occur as a related service, which supports the student's educational program. Training on AT devices may be written into the IEP as a related service.

IEP Example: Related Services

As part of his speech therapy program, Mark will receive instruction and learn to effectively use a speech generating device during social conversation in the general education classroom environment.

(IEP - Services Page)

AT Assessment Process, Continued

AT is Implemented

Implementation should focus on ensuring that the AT provided can be adequately used by the student within the environments that he/she is required to perform. Schools should plan where technology should be located, used, and maintained.

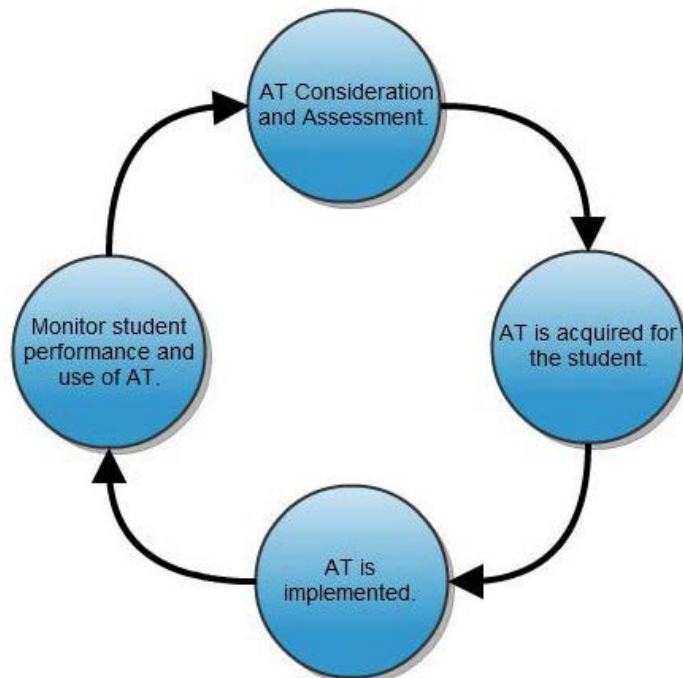

The student, family, teachers, and educational staff all require sufficient training for operating and troubleshooting problems with the AT.

Schools should also develop a contingency plan in order to ensure that a student has access to the AT tool or system in the event that the primary AT malfunctions.

The following areas should be noted when evaluating how well the AT is being implemented:

- Tools/Strategies - Identify the specific AT tools or systems that will be used.
- Specific Tasks - Identify specific tasks for which the AT will be used by the student. Include strategies that are associated with particular AT tools or systems.
- Environments - Identify where the student will be using the AT. Determine how the AT will be transported from one environment to another.
- Related IEP Goals - Identify where the use of the AT correlates with the IEP.
- Maintenance, Training, and Customization - Identify what components of the AT need to be maintained (i.e. the battery charged, cleaned, replaced). Ensure all personnel working with the student and his/her AT is trained (include content on which to be trained and timelines for training). Determine who will customize the AT (i.e. The speech pathologist will program new vocabulary on the speech generating device when needed.)
- Repairs and Contingency Planning - Note information about repairs (i.e. who to contact for repairs and how they will be funded). Develop a contingency plan to stipulate how the student will be provided with a temporary replacement or low-tech backup while the primary AT tool or system is being repaired.

AT in the school setting is a process and can be started at any point on the student's educational path.

Assistive Technology for Transition

Early Childhood Transition

Assistive technology can play an integral role in the early childhood transition process. For a child transitioning into the school system with an Individual Family Service Plan (IFSP), the team would have previously considered the AT needs of the child as required for him/her to benefit from daily routines in their natural environment and/or to achieve outcomes on the IFSP. Six months before the child turns three, the team members working with the child and his/her family are required to meet with the LEA to discuss the upcoming transition.

At this time it is important to reconsider the child's need for AT and discuss what devices and services may benefit the child as he/she may be transitioning to a new environment where activities and routines are different. There are many pieces of AT that children may need between the ages of birth to three that would continue to benefit them as they transition at the age of three.

If it is determined that the AT used in early-intervention transition with the child, the entities involved (i.e. parent, SoonerStart, LEA, etc.) need to sign an Agreement for the Purchase/Sale or Statement Declining the Sale of AT Devices.

Post-High School Transition

For the individual moving into adult life, assistive technology can facilitate greater independence⁷. As some individuals with disabilities will need AT to stay competitive with their nondisabled peers, others will require technology to independently access their environment. Regardless of the specific need, students benefit most throughout the transition process by having needed AT implemented prior to the transition.

The AT consideration process (found on page 3) should be completed when assisting transition-aged youth. Some of consideration questions may include, but are not limited to, the following:

- Is the student able to access the same material as his or her nondisabled peers?
- Is the student able to communicate his or her responses to the material?
- Are there devices, tools, software, or other resources that could help this student be more successful?
- Is the student as independent as he or she could be in school? Could assistive technology help facilitate greater independence?

As teams begin to ask these questions, they will help facilitate the youth's understanding of current curriculum materials and his/her progression to further independence. Provision of needed AT will equip the youth with tools to enable further success after high school, be it postsecondary education, training, employment, and/or independent living.

If it is determined that the AT used in high school should transition with the youth, the entities involved (i.e. LEA, DRS etc.) need to sign an Agreement for the Purchase/Sale or Statement Declining the Sale of AT Devices.

See Appendix B for Transition Resources and Appendix C for the AT Purchase/Sale Agreement.

Related Issues in IDEA 2004

Universal Design for Learning

Universal Design for Learning (UDL) is a set of principles for designing curriculum that provides all individuals, including those with learning differences, equal opportunities to learn⁵.

UDL principles call for varied and flexible ways to:

- Present or access information, concepts, and ideas (the “what” of learning)
- Plan and execute learning tasks (the “how” of learning)
- Get engaged - and stay engaged - in learning

UDL is referenced throughout the National Educational Technology Plan put forth by the U.S. Department of Education, 2010, to ensure that technology be used to optimize the diversity of learners.

See Appendix B for UDL Resources.

AT and Oklahoma Academic Standards

The Oklahoma Academic Standards focus on preparing students for College, Careers and Citizenship. This includes the Common Core State Standards for ELA and mathematics for grades Pre-K-12. Oklahoma Academic Standards serve as expectations for what students should know and be able to do by the end of the school year.

All students must have the opportunity to learn and meet the same high standards if they are to access the knowledge and skills necessary in their post-high school lives. ... The Standards should also be read as allowing for the widest possible range of students to participate fully from the outset.

Common Core State Standards Initiative – 2010

Instruction for students with disabilities must incorporate supports and accommodations, including:

- Those designed to meet the unique needs of these students and to enable their access to the general education curriculum⁶.
- An Individualized Education Program (IEP) which includes annual goals aligned with grade-level academic standards.
- Teachers and specialized instructional support personnel who are prepared and qualified to deliver high-quality, evidence-based, individualized instruction and support services.

Students with disabilities may need additional supports and services, such as:

- Instructional supports for learning - based on the principles of Universal Design for Learning (UDL) - which foster student engagement by presenting information in multiple ways and allowing for diverse avenues of action and expression.
- Instructional accommodations (Thompson, Morse, Sharpe & Hall, 2005) - changes in materials or procedures - which do not change the standards but allow students to learn within the framework of the Common Core.
- Assistive technology devices and services to ensure access to the general education curriculum and the Common Core State Standards.

See Appendix B for AT and Common Core Resources.

Related Issues in IDEA 2004, Continued

Accessible Instructional Materials (AIM) and AT

Accessible instructional materials, or AIM, are materials that are designed or converted in a way that makes them usable across the widest range of student variability regardless of format (print, digital, graphic, audio, video). Students with vision impairments, physical disabilities, and or print disabilities may need AIM in order to receive FAPE. Assistive Technology may be used and/or required to access AIM.

The following are some examples of features that can be changed to make the AIM more accessible for a student:

- Output - When using audio or text-to-speech (TTS), voices may be human or synthesized. The rate at which the text is spoken may be changed as well as the pitch of the voice (when using synthesized). The text can also be manipulated by size, fonts, colors, and contrast.
- Navigation - Navigation features allow a student to move around the recorded speech files easily. Students may move through files by chapters, sections, pages, paragraphs, and sentences.
- Bookmarking, Highlighting, and Labeling - These features allow the student to denote important parts of the text and, again, navigate through the files easily.

Teams should also be aware of the PALM Initiative to Purchase Accessible Learning Materials. As teachers, schools, and districts aim to incorporate technology into the classroom, it is increasingly important to make sure these technologies are accessible to all students. The PALM Initiative was created to help ensure that purchased technologies are inherently accessible for every student including those with disabilities.

See Appendix B for AIM and AT Resources.

AT and the Law: 504 and ADA

SECTION 504 OF THE REHABILITATION ACT OF 1973

Section 504 of the Rehabilitation Act of 1973 does not specifically define AT devices or services nor does it use the term “auxiliary aids and services.” Reference to AT in Section 504 is included in “special education and related aids and services,” the description of the delivery of an appropriate education and use of the term “supplementary aids and services,” and the discussion of academic settings in which students with disabilities should be served. A student is not required to be eligible for special education services to be protected under Section 504. Section 504 also prohibits discrimination against individuals with disabilities and requires schools to provide equal access to their programs and services^{8, 9}.

AMERICANS WITH DISABILITIES ACT

The Americans with Disabilities Act (ADA) is a civil rights law that prohibits discrimination against individuals with disabilities in areas of employment, public services, public accommodations, transportation, and communication. Title II of the ADA, which applies to schools as state or local entities, does not specifically define AT. It instead uses the term “auxiliary aids and services,” including AT along with other services such as human supports¹⁰.

Title II of the ADA states those physical barriers in existing facilities must be removed if removal is readily achievable. If not, school districts must offer alternative methods of providing the services if they are readily achievable. In addition, equal access includes the provision of auxiliary aids and services that are needed for effective communication with individuals with disabilities¹¹.

See Appendix B for Section 504 Resources

Common Questions About Assistive Technology Devices and Services

1. *What is the purpose of assistive technology in education programs?*

The purpose of assistive technology is to facilitate the student's participation in his or her education program and to enable the student to receive a free and appropriate public education (FAPE). For example, the technology may provide an alternative means of accessing the curriculum (e.g., listening to and following along with a digital textbook), an alternative means of learning, or it may provide access to the school program. Keeping the mandates of the 1997 and 2004 reauthorized IDEA in mind, assistive technology should support the student in the general curriculum and in the least restrictive environment to the greatest extent possible.

2. *Should AT be considered for all students with disabilities?*

Yes. Under consideration of special factors, the IDEA states "that the IEP team shall consider whether the child requires assistive technology devices and services." For more information about the AT consideration process, see page 3 of this document.

3. *Is AT required for all students who have an IEP?*

No. AT must be *considered* for all students with an IEP. The IEP team will determine if AT is *required* based on the results of assessments/observations, etc. For more information about the AT assessment process, see page 5 of this document.

4. *Who makes the decision if a student needs assistive technology devices or services?*

The IEP team makes the decision of whether students need AT to receive a free and appropriate public education (FAPE). The IEP team may need to rely on an AT evaluation or consultation from a team of professionals. The team could include: a speech/language pathologist, occupational therapist, physical therapist, special education teacher, psychologist, computer specialist, hearing specialist, vision specialist. Some school districts may have an assistive technology team identified and trained to provide the assistive technology evaluation on a local level. Parent input and participation is important in the evaluation process and as a member of the IEP team.

5. *How should the scope of the assistive technology evaluation and its components be determined?*

A comprehensive AT evaluation is tailored to the individual student's needs. Depending on those needs, the evaluation might address communication, written work, seating, positioning, mobility, academic and nonacademic concerns, access to the general curriculum, access to extracurricular activities, software and hardware options, environmental modifications, training, maintenance of the device, and other issues specific to the student.

6. *What are critical components of an assistive technology evaluation/assessment?*

AT assessment is a systematic process to ensure that decisions regarding the selection of AT devices are based on information regarding the student's abilities, needs, environments, and tasks. AT assessment includes a team approach, assessment of educational tasks and routines, and is ongoing in nature. Although most AT assessments are not standardized, the assessment process should be replicable and use a framework for effective decision making. See page 2 for specific examples.

7. *What is the role of parents in the AT assessment process?*

Parents are members of the IEP team and provide input in all decisions regarding AT and the IEP. Parents, and the student, if appropriate, should be invited to participate in all aspects of the process. Parents have information about their child that other team members can use to fit, customize, and adapt technology to meet their needs.

Common Questions About Assistive Technology Devices and Services

8. *What are the timelines for purchasing and/or providing assistive technology devices and services?*

IDEA regulations do not specify a timeline for the provision of assistive technology. However, if AT is determined necessary for a FAPE then it must be provided in a timely manner. “Timely manner” is defined as, “at the same time typically developing peers receive their similar materials.” The school district may not delay or deny the provision of AT due to funding issues, if a child requires AT to benefit from the IEP.

9. *Are personal use devices excluded?*

The IEP team decides on a case by case basis what AT a student needs to benefit from special education and related services. With the exception of cochlear implants or other surgically implanted devices, if a device is included in the IEP, the school is responsible for the provision of that device or ensuring that it is provided at no cost to the parents.

10. *Who is responsible for buying assistive technology?*

The school system is responsible for acquisition and provision of AT devices. Sometimes, parents may choose to purchase devices and send them to school with the student. Schools may use various funding sources to provide needed AT devices with parental consent, including but not limited to the following:

- Medicaid, Medicaid Early, Periodic, Screening, Diagnostic, and Treatment
- Medicaid Home and Community Based Waiver
- Medicaid In Home Support Waiver Medicaid Tax Equity and Fiscal Responsibility Act (TEFRA)
- IDEA Funds
- General School District Funds
- SoonerStart
- Department of Rehabilitation Services
- Private Insurance
- Financial Loan Programs
- Private/Community Resources

11. *Who owns the assistive technology device?*

It depends on who purchased the device. If the school purchased the device, the school maintains ownership. If the parents' private insurance purchased the device, then it belongs to the student. If Medicaid purchased the device, then Medicaid maintains ownership. A family or other entity (For example, Department of Rehabilitation Services) may enter into an agreement with the purchaser and buy the device(s) at a depreciated amount. A sample agreement form and device depreciation spreadsheet are included in the appendix.

12. *May the student take home assistive technology devices purchased by the school?*

Yes. As stated in the IDEA regulation 34 CFR §300.308 (b), “On a case-by-case basis, the use of school-purchased assistive technology devices in a child's home or in other settings is required if the child's IEP team determines that the child needs access to those devices in order to receive FAPE.” The IEP team will decide if a student requires the use of school-owned equipment in environments outside the school environment, including the student's home.

13. *Who is responsible for maintenance and repair of equipment?*

The local school district is responsible for:

- Maintaining the equipment (i.e. replacing batteries and charging).
- Repairing AT devices used as part of the student's special education and related services.
- Ensuring that the student receives substitute equipment while his or her device is being repaired.
- Ensuring that the external components of surgically implanted medical devices are functioning properly.

Common Questions About Assistive Technology Devices and Services

14. What provisions should be made while AT devices are being repaired?

It may not be possible to provide the same device in the interim. During the development of the student's IEP, IEP teams should identify: the steps to take if the device needs repairs; how they will secure a substitute system; and/ what other technology options used on a temporary basis during the repair process would offer an acceptable substitute to the student's device. See see page 9 for resources which provide loan equipment.

15. What provisions should be made for transfer of equipment when a student moves to another school or to a post-school program?

Local school districts should consider transferring the equipment with the student. Participating agencies should discuss the transfer of AT equipment for a student transitioning from school to post-school programs, using Memoranda of Understanding or Interagency Agreements between agencies that procure AT. Refer to Appendix B the Assistive Technology Devices Purchases/Sales Agreement Form and Sample Depreciation Spreadsheets.

16. What should happen when an assistive technology device is no longer effective for a student?

The AT team should begin the assessment process again by first gathering information about the student, environment, and tasks then continue the process with a trial of new device(s), collecting data, making a decision, and documenting in the IEP.

17. Do parents have the right to request a due process hearing over the provision of assistive technology?

Yes. AT devices and services contribute to an appropriate education for a child with disabilities and are subject to the procedural safeguards required by the IDEA, including the right to request a due process hearing. As specified in the Policies and Procedures for Special Education in Oklahoma, parents or guardians may request a hearing to determine whether an educational program is free and/or appropriate for a child with disabilities or for a child alleged to have a disability. Mediation in special education is also available to assist parents and schools in resolving disagreements regarding the education program of a student with disabilities. See page 9 for applicable resources.

AT Resources in Oklahoma

ABLE Tech

State AT Act program that provides short-term equipment loans, demonstrations, training, and information and referral on assistive technology, as well as assistance obtaining accessible instructional materials (AIM), NIMAS files, and AIM related technology

(800) 257-1705

www.ok.gov/abletech

AIM Center at OLBPH

Located at the Oklahoma Library for the Blind and Physically Handicapped, the AIM Center provides AT as it relates to reading books in accessible digital and audio formats

(800) 523-0288

(405) 521-3514

www.library.state.ok.us/aim/

Liberty Braille

Provides no-cost school term loans of textbooks in accessible formats such as large print, braille, and digital on iPad, to print-disabled students served under an IEP/ISP.

APPENDIX A

FEDERAL REGULATIONS

Federal Regulations

¹ 34 CFR §300.5 Assistive Technology Device

“Assistive technology device means any item, piece of equipment, or product system, whether acquired commercially off the shelf, modified, or customized, that is used to increase, maintain, or improve the functional capabilities of a child with a disability. The term does not include a medical device that is surgically implanted, or the replacement of such device.”

² 34 CFR §300.6 Assistive Technology Service

“Assistive technology service means any service that directly assists a child with a disability in the selection, acquisition, or use of an assistive technology device. The term includes:

- (a) The evaluation of the needs of a child with a disability, including a functional evaluation of the child in the child’s customary environment;*
- (b) Purchasing, leasing, or otherwise providing for the acquisition of assistive technology devices by children with disabilities;*
- (c) Selecting, designing, fitting, customizing, adapting, applying, maintaining, repairing, or replacing assistive technology devices;*
- (d) Coordinating and using other therapies, interventions, or services with assistive technology devices, such as those associated with existing education and rehabilitation plans and programs;*
- (e) Training or technical assistance for a child with a disability or, if appropriate, that child’s family; and,*
- (f) Training or technical assistance for professionals (including individuals providing education or rehabilitation services), employers, or other individuals who provide services to, employ, or are otherwise substantially involved in the major life functions of that child.”*

³ 34 CFR §300. 24(a)(2) Development, Review, and Revision of IEP

(2) Consideration of Special Factors.

“The IEP Team shall — (v Consider whether the child needs assistive technology devices and services.”

⁴ 34 CRF §300.105 Assistive Technology

“(a) Each public agency must ensure that assistive technology devices or assistive technology services, or both, as those terms are defined in Sec. 300.5 and 300.6, respectively, are made available to a child with a disability if required as a part of the child’s--

- (1) Special education under Sec. 300.36;*
 - (2) Related services under Sec. 300.34; or*
 - (3) Supplementary aids and services under Sec. 300.38 and 300.114(a)(2)(ii).*
- (b) On a case-by-case basis, the use of school-purchased assistive technology devices in a child’s home or in other settings is required if the child’s IEP team determines that the child needs access to those devices in order to receive FAPE.”*

⁵ **34 CFR §300.44. Universal design** *has the meaning given the term in section 3 of the Assistive Technology Act of 1998, as amended, 29 U.S.C. 3002. The definition of Universal design means a concept or philosophy for designing and delivering products and services that are usable by people with the widest possible range of functional capabilities, which include products and services that are directly accessible (without requiring assistive technologies) and products and services that are interoperable with assistive technologies.*

⁶ **CFR §300.34** *“transportation, and such developmental, corrective, and other supportive services as are required to assist a child with a disability to benefit from special education . . .”*

Federal Regulations, Continued

7 34 CFR §300.43 Transition services.

(a) *Transition services means a coordinated set of activities for a child with a disability that— (1) Is designed to be within a results oriented process, that is focused on improving the academic and functional achievement of the child with a disability to facilitate the child's movement from school to post-school activities, including postsecondary education, vocational education, integrated employment (including supported employment), continuing and adult education, adult services, independent living, or community participation; (2) Is based on the individual child's needs, taking into account the child's strengths, preferences, and interests; and includes—*

i) Instruction;

(ii) Related services;

(iii) Community experiences;

(iv) The development of employment and other post-school adult living objectives; and

(v) If appropriate, acquisition of daily living skills and provision of a functional vocational evaluation.

(b) *Transition services for children with disabilities may be special education, if provided as specially designed instruction, or a related service, if required to assist a child with a disability to benefit from special education.*

8 34 CFR §104.33 Free appropriate public education “*General. A recipient that operates a public elementary or secondary education program shall provide a free appropriate public education to each qualified handicapped person who is in the recipient's jurisdiction, regardless of the nature of severity of the person's handicap.*

(a) *Appropriate education. (1) For the purpose of this subpart, the provision of an appropriate education is the provision of regular or special education and related aids and services that are designed to meet individual education needs of handicapped persons as adequately as the needs of nonhandicapped persons are met . . .*”

9 34 CFR §104.4 Discrimination prohibited

(a) “*General. No qualified handicapped person shall, on the basis of handicap, be excluded from participation in, be denied the benefits of, or otherwise be subjected to discrimination under any program or activity which receives or benefits from Federal financial assistance.*”

10 28 CFR §35.104 Auxiliary aids and services

(1) “*Qualified interpreters, note takers, transcription services, written materials, telephone handset amplifiers, assistive listening devices, assistive listening systems, telephones compatible with hearing aids, closed caption decoders, open and closed captioning, TDDs, video text displays or other effective methods of making aurally delivered materials available to individuals with hearing impairments;*

(2) *Qualified readers, taped tests, audio recordings, large print and Braille materials or other effective methods of making visually delivered materials available to individuals with visual impairments;*

(3) *Acquisition or modification of equipment or devices; and*

(4) *Other similar services and actions.*”

11 28 CFR §35.160 General

(a) “*A public entity shall take appropriate steps to ensure that communications with applicants, participants, and members of the public with disabilities are as effective as communications with others.*

(b) (1) *A public entity shall furnish appropriate auxiliary aids and services where necessary to afford an individual with a disability an equal opportunity to participate in, and enjoy the benefits of a service, program, or activity conducted by a public entity.*

(2) *In determining what type of auxiliary aid and service is necessary, a public entity shall give primary consideration to the requests of the individual with disabilities.*”

QIAT RESOURCES

CONSIDERATION AND ASSESSMENT RESOURCES

PURCHASE/SALE AGREEMENT FORM

SAMPLE DEPRECIATION SPREADSHEETS

QIAT RESOURCES

- **SELF-EVALUATION MATRICES**

Introduction to the QIAT Self-Evaluation Matrices

The Quality Indicators in Assistive Technology (QIAT) Self-Evaluation Matrices were developed in response to formative evaluation data indicating a need for a model that could assist in the application of the Quality Indicators for Assistive Technology Services in Schools (Zabala, et. al, 2000). The QIAT Matrices are based on the idea that change does not happen immediately, but rather, moves toward the ideal in a series of steps that take place over time. The QIAT Matrices use the Innovation Configuration Matrix (ICM) developed by Hall and Hord (1985) as a structural model. The ICM provides descriptive steps ranging from the unacceptable to the ideal that can be used as benchmarks to determine the current status of practice related to a specific goal or objective and guide continuous improvement toward the ideal. It enables users to determine areas of strength that can be built upon as well as areas of challenge in need of improvement.

When the QIAT Matrices are used to guide a collaborative self-assessment conducted by a diverse group of stakeholders within an agency, the information gained can be used to plan for changes that lead to improvement throughout the organization in manageable and attainable steps. The QIAT Matrices can also be used to evaluate the level to which expected or planned-for changes have taken place by periodically analyzing changes in service delivery over time.

When completed by an individual or team, the results of the self-assessment can be used to measure areas of strength and plan for needed professional development, training, or support needed by the individual or team. When the QIAT Matrices are used by an individual or team, however, it is important to realize that the results can only reasonably reflect perceptions of the services in which that individual or team is involved and may not reflect the typical services within the organization. Since a primary goal of QIAT is to increase the quality and consistency of assistive technology (AT) services to all students throughout the organization, the perception that an individual or small group is working at the level of best practices may still indicate a need to increase the quality and consistency of services throughout the organization.

The descriptive steps included in the QIAT Matrices are meant to provide illustrative examples and may not be specifically appropriate, as written, for all environments. People using the QIAT Matrices may wish to revise the descriptive steps to align them more closely for specific environments. However, when doing this, care must be taken that the revised steps do not compromise the intent of the quality indicator to which they apply.

The QIAT Matrices document is a companion document to the list of Quality Indicators and Intent Statements. The original six indicator areas were validated by research in 2004 and revisions were made in 2005. For more information, please refer to the indicators and intent statements on the QIAT Web site at <http://www.qiat.org>. Before an item in the QIAT Matrices is discussed and rated, groups must read the entire item in the list of Quality Indicators and Intent Statements so that the intent of the item is clear.

Quality Indicators for Consideration of Assistive Technology Needs

Quality Indicator	Variations				
	UNACCEPTABLE			PROMISING PRACTICES	
1. Assistive technology (AT) devices and services are <u>considered for all students with disabilities</u> regardless of type or severity of disability.	1 AT is not considered for students with disabilities.	2 AT is considered only for students with severe disabilities or students in specific disability categories.	3 AT is considered for all students with disabilities but the consideration is inconsistently based on the unique educational needs of the student.	4 AT is considered for all students with disabilities and the consideration is generally based on the unique educational needs of the student.	5 AT is considered for all students with disabilities and the consideration is consistently based on the unique educational needs of the student.
2. During the development of the individualized educational program (IEP), every IEP team consistently uses a <u>collaborative decision-making process</u> that supports systematic consideration of each student's possible need for AT devices and services.	1 No process is established for IEP teams to use to make AT decisions.	2 A process is established for IEP teams to use to make AT decisions but it is not collaborative.	3 A collaborative process is established but not generally used by IEP teams to make AT decisions.	4 A collaborative process is established and generally used by IEP teams to make AT decisions.	5 A collaborative process is established and consistently used by IEP teams to make AT decisions.
3. IEP team members have the <u>collective knowledge and skills</u> needed to make informed AT decisions and seek assistance when needed.	1 The team does not have the knowledge or skills needed to make informed AT decisions. The team does not seek help when needed.	2 Individual team members have some of the knowledge and skills needed to make informed AT decisions. The team does not seek help when needed.	3 Team members sometimes combine knowledge and skills to make informed AT decisions. The team does not always seek help when needed.	4 Team members generally combine their knowledge and skills to make informed AT decisions. The team seeks help when needed.	5 The team consistently uses collective knowledge and skills to make informed AT decisions. The team seeks help when needed.

<p>4. Decisions regarding the need for AT devices and services <u>are based on the student's IEP goals and objectives, access to curricular and extracurricular activities, and progress in the general education curriculum.</u></p>	<p style="text-align: center;">1</p> <p>Decisions about a student's need for AT are not connected to IEP goals or the general curriculum.</p>	<p style="text-align: center;">2</p> <p>Decisions about a student's need for AT are based on either access to the curriculum/IEP goals or the general curriculum, not both.</p>	<p style="text-align: center;">3</p> <p>Decisions about a student's need for AT sometimes are based on both the student's IEP goals and general education curricular tasks.</p>	<p style="text-align: center;">4</p> <p>Decisions about a student's need for AT generally are based on both the student's IEP goals and general education curricular tasks.</p>	<p style="text-align: center;">5</p> <p>Decisions about a student's need for AT consistently are based on both the student's IEP goals and general education curricular tasks.</p>
<p>5. The IEP team <u>gathers and analyzes data about the student, customary environments, educational goals, and tasks when considering a student's need for AT devices and services.</u></p>	<p style="text-align: center;">1</p> <p>The IEP team does not gather and analyze data to consider a student's need for AT devices and services.</p>	<p style="text-align: center;">2</p> <p>The IEP team gathers and analyzes data about the student, customary environments, educational goals or tasks, not all, when considering a student's need for AT devices and services.</p>	<p style="text-align: center;">3</p> <p>The IEP team sometimes gathers and analyzes data about the student, customary environments, educational goals and tasks when considering a student's need for AT devices and services.</p>	<p style="text-align: center;">4</p> <p>The IEP team generally gathers and analyzes data about the student, customary environments, educational goals and tasks when considering a student's need for AT devices and services.</p>	<p style="text-align: center;">5</p> <p>The IEP team consistently gathers and analyzes data about the student, customary environments, educational goals and tasks when considering a student's need for AT devices and services.</p>
<p>6. When AT is needed, the IEP team <u>explores a range of AT devices, services, and other supports that address identified needs.</u></p>	<p style="text-align: center;">1</p> <p>The IEP team does not explore a range of AT devices, services, and other supports to address identified needs.</p>	<p style="text-align: center;">2</p> <p>The IEP team considers a limited set of AT devices, services, and other supports.</p>	<p style="text-align: center;">3</p> <p>The IEP team sometimes explores a range of AT devices, services, and other supports.</p>	<p style="text-align: center;">4</p> <p>The IEP team generally explores a range of AT devices, services, and other supports.</p>	<p style="text-align: center;">5</p> <p>The IEP team always explores a range of AT devices, services, and other supports to address identified needs.</p>
<p>7. The AT consideration process and <u>results are documented in the IEP and include a rationale for the decision and supporting evidence.</u></p>	<p style="text-align: center;">1</p> <p>The consideration process and results are not documented in the IEP.</p>	<p style="text-align: center;">2</p> <p>The consideration process and results are documented in the IEP but do not include a rationale for the decision and supporting evidence.</p>	<p style="text-align: center;">3</p> <p>The consideration process and results are documented in the IEP and sometimes include a rationale for the decision and supporting evidence.</p>	<p style="text-align: center;">4</p> <p>The consideration process and results are documented in the IEP and generally include a rationale for the decision and supporting evidence.</p>	<p style="text-align: center;">5</p> <p>The consideration process and results are documented in the IEP and consistently include a rationale for the decision and supporting evidence.</p>

Quality Indicators for Assessment of Assistive Technology Needs

Quality Indicator	Variations				
	UNACCEPTABLE				PROMISING PRACTICES
1. <u>Procedures</u> for all aspects of AT assessment are clearly defined and consistently applied.	1 No procedures are defined.	2 Some assessment procedures are defined, but not generally used.	3 Procedures are defined and used only by specialized personnel.	4 Procedures are clearly defined and generally used in both special and general education.	5 Clearly defined procedures are used by everyone involved in the assessment process.
2. AT assessments are conducted by a <u>team with the collective knowledge and skills needed</u> to determine possible AT solutions that address the needs and abilities of the student, demands of the customary environments, educational goals, and related activities.	1 A designated individual with no prior knowledge of the student's needs or technology conducts assessments.	2 A designated person or group of individuals who have knowledge of technology, but not of the student's needs, environments, or tasks conducts assessments.	3 A designated team with knowledge of AT conducts assessments with limited input from individuals who have knowledge of the student's needs, environments, and tasks.	4 A team whose members have direct knowledge of the student's needs, environments, tasks, and knowledge of AT generally conducts assessments.	5 Flexible teams formed on the basis of knowledge of the individual student's needs, environments, tasks, and expertise in AT consistently conduct assessments.
3. All AT assessments include a functional assessment in the student's <u>customary environments</u>, such as the classroom, lunchroom, playground, home, community setting, or work place.	1 No component of the AT assessment is conducted in any of the student's customary environments.	2 No component of the AT assessment is conducted in any of the customary environments, however, data about the customary environments are sought.	3 Functional components of AT assessments are sometimes conducted in the student's customary environments.	4 Functional components of AT assessments are generally conducted in the student's customary environments.	5 Functional components of AT assessments are consistently conducted in the student's customary environments.

<p>4. AT assessments, including needed trials, are completed within <u>reasonable timelines</u>.</p>	<p>1 AT assessments are not completed within agency timelines.</p>	<p>2 AT assessments are frequently out of compliance with timelines.</p>	<p>3 AT assessments are completed within a reasonable timeline and may or may not include initial trials.</p>	<p>4 AT assessments are completed within a reasonable timeline and include at least initial trials.</p>	<p>5 AT assessments are conducted in a timely manner and include a plan for ongoing assessment and trials in customary environments.</p>
<p>5. Recommendations from AT assessments are <u>based on data</u> about the student, environments and tasks.</p>	<p>1 Recommendations are not data based.</p>	<p>2 Recommendations are based on incomplete data from limited sources.</p>	<p>3 Recommendations are sometimes based on data about student performance on typical tasks in customary environments.</p>	<p>4 Recommendations are generally based on data about student performance on typical tasks in customary environments.</p>	<p>5 Recommendations are consistently based on data about student performance on typical tasks in customary environments.</p>
<p>6. The assessment provides the IEP team with clearly <u>documented recommendations</u> that guide decisions about the selection, acquisition, and use of AT devices and services.</p>	<p>1 Recommendations are not documented.</p>	<p>2 Documented recommendations include only devices. Recommendations about services are not documented.</p>	<p>3 Documented recommendations may or may not include sufficient information about devices and services to guide decision-making and program development.</p>	<p>4 Documented recommendations generally include sufficient information about devices and services to guide decision-making and program development.</p>	<p>5 Documented recommendations consistently include sufficient information about devices and services to guide decision-making and program development.</p>
<p>7. AT needs are <u>reassessed</u> any time changes in the student, the environments and/or the tasks result in the student's needs not being met with current devices and/or services.</p>	<p>1 AT needs are not reassessed.</p>	<p>2 AT needs are only reassessed when requested. Reassessment is done formally and no ongoing AT assessment takes place.</p>	<p>3 AT needs are reassessed on an annual basis or upon request. Reassessment may include some ongoing and formal assessment strategies.</p>	<p>4 AT use is frequently monitored. AT needs are generally reassessed if current tools and strategies are ineffective. Reassessment generally includes ongoing assessment strategies and includes formal assessment, if indicated.</p>	<p>5 AT use is frequently monitored. AT needs are generally reassessed if current tools and strategies are ineffective. Reassessment generally includes ongoing assessment strategies and includes formal assessment, if indicated.</p>

Quality Indicators for Including Assistive Technology in the IEP

Quality Indicator	Variations				
	UNACCEPTABLE			PROMISING PRACTICES	
1. The education agency has <u>guidelines for documenting</u> AT needs in the IEP and requires their consistent application.	1 The agency does not have guidelines for documenting AT in the IEP.	2 The agency has guidelines for documenting AT in the IEP but team members are not aware of them.	3 The agency has guidelines for documenting AT in the IEP and members of some teams are aware of them.	4 The agency has guidelines for documenting AT in the IEP and members of most teams are aware of them.	5 The agency has guidelines for documenting AT in the IEP and members of all teams are aware of them.
2. All <u>services</u> that the IEP team determines are needed to support the selection, acquisition, and use of AT devices are designated in the IEP.	1 AT devices and services are not documented in the IEP.	2 Some AT devices and services are minimally documented. Documentation does not include sufficient information to support effective implementation.	3 Required AT devices and services are documented. Documentation sometimes includes sufficient information to support effective implementation.	4 Required AT devices and services are documented. Documentation generally includes sufficient information to support effective implementation.	5 Required AT devices and services are documented. Documentation consistently includes sufficient information to support effective implementation.
3. The IEP illustrates that AT is a <u>tool to support achievement of goals</u> and progress in the general curriculum by establishing a clear relationship between student needs, AT devices and services, and the student's goals and objectives.	1 AT use is not linked to IEP goals and objectives or participation and progress in the general curriculum.	2 AT use is sometimes linked to IEP goals and objectives but not linked to the general curriculum.	3 AT use is linked to IEP goals and objectives and sometimes linked to the general curriculum.	4 AT is linked to IEP goals and objectives and is generally linked to the general curriculum.	5 AT is linked to the IEP goals and objectives and is consistently linked to the general curriculum.

<p>4. IEP content regarding AT use is written in language that describes how AT contributes to achievement of <u>measurable and observable outcomes</u>.</p>	<p style="text-align: center;">1</p> <p>The IEP does not describe outcomes to be achieved through AT use.</p>	<p style="text-align: center;">2</p> <p>The IEP describes outcomes to be achieved through AT use, but they are not measurable.</p>	<p style="text-align: center;">3</p> <p>The IEP describes outcomes to be achieved through AT use, but only some are measurable.</p>	<p style="text-align: center;">4</p> <p>The IEP generally describes observable, measurable outcomes to be achieved through AT use.</p>	<p style="text-align: center;">5</p> <p>The IEP consistently describes observable, measurable outcomes to be achieved through AT use.</p>
<p>5. AT is included in the IEP in a manner that provides a <u>clear and complete</u> description of the devices and services to be provided and used to address student needs and achieve expected results.</p>	<p style="text-align: center;">1</p> <p>Devices and services needed to support AT use are not documented.</p>	<p style="text-align: center;">2</p> <p>Some devices and services are documented but they do not adequately support AT use.</p>	<p style="text-align: center;">3</p> <p>Devices and services are documented and are sometime adequate to support AT use.</p>	<p style="text-align: center;">4</p> <p>Devices and services are documented and are generally adequate to support AT use.</p>	<p style="text-align: center;">5</p> <p>Devices and services are documented and are consistently adequate to support AT use.</p>

Quality Indicators for Assistive Technology Implementation

Quality Indicator	Variations				
	UNACCEPTABLE				PROMISING PRACTICES
1. AT implementation proceeds according to a <u>collaboratively developed plan</u>.	1 There is no implementation plan.	2 Individual team members may develop AT implementation plans independently.	3 Some team members collaborate in the development of an AT implementation plan.	4 Most team members collaborate in the development of AT implementation plan.	5 All team members collaborate in the development of a comprehensive AT implementation plan.
2. AT is <u>integrated</u> into the curriculum and daily activities of the student across environments.	1 AT included in the IEP is rarely used.	2 AT is used in isolation with no links to the student's curriculum and/or daily activities.	3 AT is sometimes integrated into the student's curriculum and daily activities.	4 AT is generally integrated into the student's curriculum and daily activities.	5 AT is fully integrated into the student's curriculum and daily activities.
3. Persons supporting the student across all environments in which the AT is expected to be used <u>share responsibility</u> for implementation of the plan.	1 Responsibility for implementation is not accepted by any team member.	2 Responsibility for implementation is assigned to one team member.	3 Responsibility for implementation is shared by some team members in some environments.	4 Responsibility for implementation is generally shared by most team members in most environments.	5 Responsibility for implementation is consistently shared among team members across all environments.
4. Persons supporting the student provide opportunities for the student to use <u>a variety of strategies—including AT</u>—and to learn which strategies are most effective for particular circumstances and tasks.	1 No strategies are provided to support the accomplishment of tasks.	2 Only one strategy is provided to support the accomplishment of tasks.	3 Multiple strategies are provided. Students are sometimes encouraged to select and use the most appropriate strategy for each task.	4 Multiple strategies are provided. Students are generally encouraged to select and use the most appropriate strategy for each task.	5 Multiple strategies are provided. Students are consistently encouraged to select and use the most appropriate strategy for each task.

<p>5. Learning opportunities for the student, family and staff is an integral part of implementation.</p>	<p style="text-align: center;">1</p> <p>AT needs for learning opportunities have not been determined.</p>	<p style="text-align: center;">2</p> <p>AT learning opportunities needs are initially identified for student, family, and staff, but no training has been provided.</p>	<p style="text-align: center;">3</p> <p>Initial AT learning opportunities are sometimes provided to student, family, and staff.</p>	<p style="text-align: center;">4</p> <p>Initial and follow-up AT learning opportunities are generally provided to student, family, and staff</p>	<p style="text-align: center;">5</p> <p>Ongoing AT learning opportunities are provided to student, family, and staff as needed, based on changing needs.</p>
<p>6. AT implementation is initially based on assessment data and is adjusted based on performance data.</p>	<p style="text-align: center;">1</p> <p>AT implementation is based on equipment availability and limited knowledge of team members, not on student data.</p>	<p style="text-align: center;">2</p> <p>AT implementation is loosely based on initial assessment data and rarely adjusted.</p>	<p style="text-align: center;">3</p> <p>AT implementation is based on initial assessment data and is sometimes adjusted as needed based on student progress.</p>	<p style="text-align: center;">4</p> <p>AT implementation is based on initial assessment data and is generally adjusted as needed based on student progress.</p>	<p style="text-align: center;">5</p> <p>AT implementation is based on initial assessment data and is consistently adjusted as needed based on student progress.</p>
<p>7. AT implementation includes management and maintenance of equipment and materials.</p>	<p style="text-align: center;">1</p> <p>Equipment and materials are not managed or maintained. Students rarely have access to the equipment and materials they require.</p>	<p style="text-align: center;">2</p> <p>Equipment and materials are managed and maintained on a crisis basis. Students frequently do not have access to the equipment and materials they require.</p>	<p style="text-align: center;">3</p> <p>Equipment and materials are managed and maintained so that students sometimes have access to the equipment and materials they require.</p>	<p style="text-align: center;">4</p> <p>Equipment and materials are managed and maintained so that students generally have access to the equipment and materials they require.</p>	<p style="text-align: center;">5</p> <p>Equipment and materials are effectively managed and maintained so that students consistently have access to the equipment and materials they require.</p>

Quality Indicators for Evaluation of the Effectiveness of Assistive Technology

Quality Indicator	Variations				
	UNACCEPTABLE				PROMISING PRACTICES
1. Team members share <u>clearly defined responsibilities</u> to ensure that data are collected, evaluated, and interpreted by capable and credible team members.	1 Responsibilities for data collection, evaluation, or interpretation are not defined.	2 Responsibilities for data collection, evaluation, or interpretation of data are assigned to one team member.	3 Responsibilities for collection, evaluation and interpretation of data are shared by some team members.	4 Responsibilities for collection, evaluation and interpretation of data are shared by most team members.	5 Responsibilities for collection, evaluation and interpretation of data are consistently shared by team members.
2. Data are collected on specific student achievement that has been identified by the team and is <u>related to one or more goals</u>.	1 Team neither identifies specific changes in student behaviors expected from AT use nor collects data.	2 Team identifies student behaviors and collects data, but the behaviors are either not specific or not related to IEP goal(s).	3 Team identifies specific student behaviors related to IEP goals, but inconsistently collects data.	4 Team identifies specific student behaviors related to IEP goals, and generally collects data.	5 Team identifies specific student behaviors related to IEP goals, and consistently collects data on changes in those behaviors.
3. Evaluation of effectiveness includes the <u>quantitative and qualitative</u> measurement of changes in the student's performance and achievement.	1 Effectiveness is not evaluated.	2 Evaluation of effectiveness is based on something other than student performance, such as changes in staff behavior and/or environmental factors.	3 Evaluation of effectiveness is based on subjective information about student performance.	4 Evaluation of effectiveness is generally based on objective information about student performance from a few data sources.	5 Evaluation of effectiveness is consistently based on objective information about student performance obtained from a variety of data sources.

<p>4. Effectiveness is evaluated <u>across environments</u> including during naturally occurring opportunities as well as structured activities.</p>	<p>1 Effectiveness is not evaluated in any environment.</p>	<p>2 Effectiveness is evaluated only during structured opportunities in controlled environments (e.g. massed trials data).</p>	<p>3 Effectiveness is evaluated during structured activities across environments and a few naturally occurring opportunities.</p>	<p>4 Effectiveness is generally evaluated during naturally occurring opportunities and structured activities in multiple environments.</p>	<p>5 Effectiveness is consistently evaluated during naturally occurring opportunities and structured activities in multiple environments.</p>
<p>5. Data are collected to provide teams with a means for <u>analyzing student achievement and identifying supports and barriers</u> that influence AT use to determine what changes, if any, are needed.</p>	<p>1 No data are collected or analyzed.</p>	<p>2 Data are collected but are not analyzed.</p>	<p>3 Data are superficially analyzed.</p>	<p>4 Data are sufficiently analyzed most of the time.</p>	<p>5 Data are sufficiently analyzed all of the time.</p>
<p>6. <u>Changes are made in the student's AT services and educational program</u> when evaluation data indicate that such changes are needed to improve student achievement.</p>	<p>1 Program changes are never made.</p>	<p>2 Program changes are made in the absence of data.</p>	<p>3 Program changes are loosely linked to student performance data.</p>	<p>4 Program changes are generally linked to student performance data.</p>	<p>5 Program changes are consistently linked to student performance data.</p>
<p>7. Evaluation of effectiveness is a <u>dynamic, responsive, ongoing process</u> that is reviewed periodically.</p>	<p>1 No process is used to evaluate effectiveness.</p>	<p>2 Evaluation of effectiveness only takes place annually, but the team does not make program changes based on data.</p>	<p>3 Evaluation of effectiveness only takes place annually and the team uses the data to make annual program changes.</p>	<p>4 Evaluation of effectiveness takes place on an on-going basis and team generally uses the data to make program changes.</p>	<p>5 Evaluation of effectiveness takes place on an on-going basis and the team consistently uses the data to make program changes.</p>

Quality Indicators for Assistive Technology Transition

Quality Indicator	Variations				
	UNACCEPTABLE				PROMISING PRACTICES
1. <u>Transition plans address the AT needs of the student, including roles and training needs of team members, subsequent steps in AT use, and follow-up after transition takes place.</u>	1 Transition plans do not address AT needs.	2 Transition plans rarely address AT needs, critical roles, steps or follow-up.	3 Transition plans sometimes address AT needs but may not include critical roles, steps or follow-up.	4 Transition plans always address AT needs and usually include critical roles, steps or follow-up.	5 Transition plans consistently address AT needs and all team members are involved and knowledgeable about critical roles, steps and follow-up.
2. <u>Transition planning empowers the student using AT to participate in the transition planning at a level appropriate to age and ability.</u>	1 Student is not present.	2 Student may be present but does not participate or input is ignored.	3 Student sometimes participates and some student input is considered.	4 Student participates and student input is generally reflected in the transition plan.	5 Student is a full participant and student input is consistently reflected in the transition plan.
3. <u>Advocacy related to AT use is recognized as critical and planned for by the teams involved in transition.</u>	1 No one advocates for AT use or the development of student's self-determination skills.	2 Advocacy rarely occurs for AT use or the development of student self-determination skills.	3 Advocacy sometimes occurs for AT use and the development of student self-determination skills.	4 Advocacy usually occurs for AT use and the development of student self-determination skills.	5 Advocacy consistently occurs for AT use and the development of student self-determination skills.
4. <u>AT requirements in the receiving environment are identified during the transition planning process.</u>	1 AT requirements in the receiving environment are not identified.	2 AT requirements in the receiving environment are rarely identified	3 AT requirements in the receiving environment are identified, some participants are involved and some requirements are addressed.	4 AT requirements in the receiving environment are identified, most participants are involved and most requirements are addressed.	5 AT requirements in the receiving environment are consistently identified by all participants.

5. Transition planning for students using AT proceeds according to an <u>individualized timeline</u>.	1 Individualized timelines are not developed to support transition planning for students using AT.	2 Individualized timelines are developed, but do not support transition planning for students using AT.	3 Individualized timelines are sometimes developed and support transition planning for students using AT.	4 Individualized timelines are generally developed and support transition planning for students using AT.	5 Individualized timelines are consistently developed and support transition planning for students using AT.
6. Transition plans address specific <u>equipment, training and funding</u> issues such as transfer or acquisition of AT, manuals and support documents.	1 The plans do not address AT equipment, training and funding issues.	2 The plans rarely address AT equipment, training and/or funding issues.	3 The plans sometimes address AT equipment, training or funding issues.	4 The plans usually address AT equipment, training and funding issues.	5 The plans consistently address AT equipment, training and funding issues.

Quality Indicators for Administrative Support of Assistive Technology

Quality Indicator	Variations				
	UNACCEPTABLE				PROMISING PRACTICES
1. The education agency has <u>written procedural guidelines</u> that ensure equitable access to AT devices and services for students with disabilities, if required for a free appropriate public education (FAPE).	1	2	3	4	5
	No written procedural guidelines are in place.	Written procedural guidelines for few components of AT service delivery are in place. (i.e. assessment or consideration)	Written procedural guidelines that address several components of AT service delivery are in place.	Written procedural guidelines that address most components of AT service delivery are in place.	Comprehensive written procedural guidelines that address all components of AT service delivery are in place.
2. The education agency <u>broadly disseminates clearly defined procedures for accessing and providing AT services and supports the implementation of those guidelines.</u>	1	2	3	4	5
	No procedures disseminated and no plan to disseminate.	A plan for dissemination exists, but has not been implemented.	Procedures are disseminated to a few staff who work directly with AT.	Procedures are disseminated to most agency personnel and generally used.	Procedures are disseminated to all agency personnel and consistently used.
3. The education agency includes appropriate AT responsibilities in <u>written descriptions of job requirements</u> for each position in which activities impact AT services.	1	2	3	4	5
	No job requirements relating to AT are written.	Job requirements related to AT are written only for a few specific personnel who provide AT services.	Job requirements related to AT are written for most personnel who provide AT services but are not clearly aligned to job responsibilities.	Job requirements related to AT are written for most personnel who provide AT services and are generally aligned to job responsibilities.	Job requirements related to AT are written for all personnel who provide AT services and are clearly aligned to job responsibilities.

<p>4. The education agency employs <u>personnel with the competencies needed to support quality AT services within their primary areas of responsibility at all levels of the organization.</u></p>	<p>1 AT competencies are not considered in hiring, assigning or evaluating personnel.</p>	<p>2 AT competencies are recognized as an added value in an employee but are not sought.</p>	<p>3 AT competencies are recognized and sought for specific personnel.</p>	<p>4 AT competencies are generally valued and used in hiring, assigning and evaluating personnel.</p>	<p>5 AT competencies are consistently valued and used in hiring, assigning and evaluating personnel.</p>
<p>5. The education agency includes <u>AT in the technology planning and budgeting process.</u></p>	<p>1 There is no planning and budgeting process for AT.</p>	<p>2 AT planning and budgeting is a special education function that is not included in the agency-wide technology planning and budgeting process.</p>	<p>3 AT is sometimes included in the agency-wide technology planning and budgeting process, but is inadequate to meet AT needs throughout the agency.</p>	<p>4 AT is generally included in agency-wide technology planning and budgeting process in a way that meets most AT needs throughout the agency.</p>	<p>5 AT is included in the agency-wide technology planning and budgeting process in a way that meets AT needs throughout the agency.</p>
<p>6. The education agency provides access to <u>ongoing learning opportunities about AT for staff, family, and students.</u></p>	<p>1 No learning opportunities related to AT are provided.</p>	<p>2 Learning opportunities related to AT are provided on a crisis-basis only. Learning opportunities may not be available to all who need them.</p>	<p>3 Learning opportunities related to AT are provided to some individuals on a pre-defined schedule.</p>	<p>4 Learning opportunities related to AT are provided on a pre-defined schedule to most individuals with some follow-up opportunities.</p>	<p>5 Learning opportunities related to AT are provided on an ongoing basis to address the changing needs of students with disabilities, their families and the staff who serve them.</p>
<p>7. The education agency uses a <u>systematic process to evaluate all components of the agency-wide AT program.</u></p>	<p>1 The agency-wide AT program is not evaluated.</p>	<p>2 Varying procedures are used to evaluate some components of the agency-wide AT program.</p>	<p>3 A systematic procedure is inconsistently used to evaluate a few components of the agency-wide AT program.</p>	<p>4 A systematic procedure is generally used to evaluate most components of the agency-wide AT program.</p>	<p>5 A systematic procedure is consistently used throughout the agency to evaluate all components of the agency-wide AT program.</p>

Quality Indicators for Professional Development and Training in Assistive Technology

Quality Indicator	Variations				
	UNACCEPTABLE				PROMISING PRACTICES
1. Comprehensive AT professional development and training <u>support the understanding that AT devices and services enable students to accomplish IEP goals and objectives and make progress in the general curriculum.</u>	1 There is no professional development and training in the use of AT.	2 Professional development and training only addresses technical aspects of AT tools and/or is not related to use for academic achievement.	3 Some professional development and training includes strategies for use of AT devices and services to facilitate academic achievement.	4 Most professional development and training includes strategies for use of AT devices and services to facilitate academic achievement.	5 All professional development and training includes strategies for use of AT devices and services to facilitate academic achievement.
2. The education agency has an AT professional development and training plan that <u>identifies the audiences, the purposes, the activities, the expected results, evaluation measures and funding for AT professional development and training.</u>	1 There is no plan for AT professional development and training.	2 The plan includes unrelated activities done on a sporadic basis for a limited audience.	3 The plan includes some elements (e.g. variety of activities, purpose, levels) for some audiences.	4 The plan includes most elements of a comprehensive plan, for most audiences.	5 The comprehensive AT professional development plan encompasses all elements, audiences, and levels.
3. The comprehensive AT professional development and training <u>content addresses all aspects of the selection, acquisition and use of AT.</u>	1 There is no professional development and training on related to selection, acquisition, and use of AT.	2 Professional development and training addresses few aspects of selection, acquisition, and use of AT.	3 Professional development and training addresses some aspects of selection, acquisition, and use of AT.	4 Professional development and training addresses most aspects of selection, acquisition, and use of AT.	5 Professional development and training addresses all aspects of selection, acquisition, and use of AT.

<p>4. AT professional development and training address and are <u>aligned with other local, state and national professional development initiatives.</u></p>	<p>1 Professional development and training does not consider other initiatives.</p>	<p>2 Professional development and training rarely aligns with other initiatives.</p>	<p>3 Professional development and training sometimes aligns with other initiatives.</p>	<p>4 Professional development and training generally aligns with other initiatives.</p>	<p>5 Professional development and training consistently aligns with other initiatives as appropriate.</p>
<p>5. AT professional development and training include <u>ongoing learning opportunities that utilize local, regional, and/or national resources.</u></p>	<p>1 There are no professional development and training opportunities.</p>	<p>2 Professional development and training occurs infrequently.</p>	<p>3 Professional development and training is sometimes provided.</p>	<p>4 Professional development and training is generally provided.</p>	<p>5 Professional development and training opportunities are provided on a comprehensive, repetitive and continuous schedule utilizing appropriate local, regional and national resources.</p>
<p>6. Professional development and training in AT follow <u>research-based models for adult learning that include multiple formats and are delivered at multiple skill levels.</u></p>	<p>1 Professional development and training never considers adult learning.</p>	<p>2 Professional development and training rarely considers models for adult learning strategies.</p>	<p>3 Professional development and training sometimes considers research-based adult learning strategies.</p>	<p>4 Professional development and training generally considers research-based adult learning strategies.</p>	<p>5 Professional development and training consistently considers research-based adult learning strategies.</p>
<p>7. The effectiveness of AT professional development and training is <u>evaluated by measuring changes in practice that result in improved student performance.</u></p>	<p>1 Changes in practice are not measured.</p>	<p>2 Changes in practice are rarely measured.</p>	<p>3 Changes in practice are measured using a variety of measures but may not be related to student performance.</p>	<p>4 Changes in practice are usually measured using a variety of reliable measures linked to improved student performance.</p>	<p>5 Changes in practice are consistently measured using a variety of reliable measures linked to improved student performance.</p>

Persons participating in consideration:		

1. Review each area below and mark to indicate any areas in which there are concerns about the ability to function as independently as possible in that area because of disabilities. Review the goals and objectives of the service plan to determine if any functional limitations will impede progress.

Physical: (health, motor abilities, seating, positioning)	Academic Performance: Basic and content reading; Reading comprehension; Mathematics calculation, reasoning and application; Written expression; Oral expression; Listening comprehension; Learning preference; learning style, strategies; Effect of the disability on acquisition, development, mastery and applications of academic skills.	Vocational Performance: General work behaviors; Following directions; Working independently or with job supports; Job preferences or interests; Dexterity; Abilities; Interpersonal relationships and socialization; Related work skills.
Sensory: (Vision, hearing, sensitivity to/of touch)		
Communication: Speech sound production and use, receptive and expressive language, voice, fluency, augmentative and alternative communication	Environmental Control: Ability to control events within the environment; Ability to interact with others to influence actions of others	Recreation / Leisure: Free time, maintenance of physical fitness, use of generic community recreation facilities and resources and degree of social involvement.
Cognitive: An appraisal of aptitude and mental processes by which an individual applies knowledge, thinks and solves problems.	Social Competence: Adaptive behaviors and social skills, which enable a child or youth to meet environmental demands and to assume responsibility for his own and other's welfare.	Other:

2. **If there are no areas of concern, proceed to Step. #9.**
- Enter each highlighted area into a box in the first column of the grid below, along with the specific functions that are of concern (see table above for examples)
 - If there are areas of concern, write the SPECIFIC tasks related to progress in that area that this person needs to be able to do or learn to do that currently would be difficult or impossible to do without assistance.
 - For each task listed, determine how barriers to doing those tasks are currently addressed (special strategies? Accommodations? Modifications? Assistive technology?). Enter this information in Column A
 - Determine if there are any continuing barriers encountered when attempting a task? If yes, complete Column B.
 - Consider whether the use of new or additional assistive technology would: (a) enable performance of this task with more ease, efficiency, or in a less restrictive environment, or (b) perform the task successfully with less personal assistance. If yes, indicate in column C.
 - If team members are not familiar with assistive technology tools that could address remaining barriers or need additional assistance, indicate in column C that further investigation is necessary in this area.
9. **Analyze the information that has been entered in the previous steps, then complete the Summary of Consideration to reflect the results of the analysis.**

Area(s) in which functional capabilities are currently of concern (Enter only one on each line. Use additional sheet for more areas of concern.)	Consider functioning in all customary environments.			
	Identify specific tasks in this area that are difficult or impossible at this time at expected level of independence.	A) Describe the special strategies, accommodations, and tools that are currently being used to lower barriers to the task.	B) Are there continuing barriers encountered when the student attempts this task? If so, describe.	C) Describe new or additional assistive technology to be tried to address continuing barriers, or indicate a need for further investigation.

SUMMARY OF THE CONSIDERATION of possible need for assistive technology services. If the team has determined that a need exists, describe what will be provided (more specific assessment of need for assistive technology; existing tools, adaptation or modification of existing tools; additional tools; technical assistance on device operation or use, training of student, staff, or family, etc.).

Decision	Summary of Consideration		
	Needs are currently being met without assistive technology. It is anticipated that current goals can be worked toward without assistive technology devices or services. AT is not necessary at this time.		
	It is anticipated that adequate progress cannot be made without the support of assistive technology. Assistive technology devices /services are required by this student and will be used for designated tasks in customary environments. (Specify nature and duration in the plan)		
	Further investigation / assessment is necessary to determine if or what assistive technology devices and services may be required. (Specify nature and timeline of investigation in the plan)		
List AT devices and services to be provided. Include those currently used successfully, and those to be tried or added.	Responsible Parties	Initiation	Duration
Trials with a variety			

SETT SCAFFOLD FOR GATHERING DATA–ANNOTATED

Collaboratively Gather and Analyze Information from a Variety of Sources

Student: _____ Date: _____ Perspective: _____

EXAMINING CURRENT CONDITIONS TO ESTABLISH EDUCATIONAL NEED		
STUDENT	ENVIRONMENTS	TASKS
<p>INFORMATION RELATED SPECIFICALLY TO THE STUDENT, INCLUDING SPECIFIC AREAS OF CONCERN, SPECIAL NEEDS, CURRENT ACHIEVEMENT, INTERESTS, GOALS, ETC.</p> <p><i>f</i> Build shared knowledge about the student that can be used to identify need for tools, guide decisions about tools, and assist in planning implementation and evaluation of effectiveness.</p> <p><i>f</i> Determine what still needs to be known and how it can be found out.</p> <p><i>f</i> Add additional information as it becomes available through evaluation, implementation, or discussion</p>	<p>INFORMATION RELATED TO ANYONE WHO IS AROUND THE STUDENT OR ANYTHING THAT IS PROVIDED TO THE STUDENT.</p> <p><i>f</i> Build shared knowledge about the environments in which the student is, or can be, expected to learn and grow. This information can be used to identify need for environmental supports and training, and assist in planning implementation and evaluation of effectiveness.</p> <p><i>f</i> Determine what still needs to be known and how it can be found out.</p> <p><i>f</i> Add additional information as it becomes available through evaluation, implementation or discussion</p>	<p>INFORMATION SPECIFICALLY RELATED TO THE DETAILS OF THE TASKS THAT ARE CURRENTLY REQUIRED OF THE STUDENT OR WILL BE REQUIRED IN THE NEAR FUTURE.</p> <p><i>f</i> Build shared knowledge about the tasks that the student needs to do or learn to do that are currently difficult or impossible for the student to do at the expected level of independence.</p> <p><i>f</i> This information can be used to identifying the type of tools needed, but will also play a critical role in planning implementation and evaluation of effectiveness.</p> <p><i>f</i> Determine what still needs to be known and how it can be found out.</p> <p><i>f</i> Add additional information as it becomes available through evaluation, implementation, discussion.</p> <p><i>f</i></p>

SETT SCAFFOLD FOR TOOL SELECTION – PART 1 - IDENTIFYING TOOLS

Develop Descriptors of an Assistive Technology Tool System that Addresses Needs and Identify Possible Tools

STUDENT: _____ AREA OF ESTABLISHED NEED (See SETT: Part I): _____

STEP 1: Based on S-E-T data, enter descriptors or functions needed by the student across the shaded top row - 1 descriptor per column
STEP 2: Enter promising tools in the shaded left column - 1 tool per row
STEP 3: For each tool, note matches with descriptors and functions to help guide discussion of devices and services
USE ADDITIONAL SHEETS IF NECESSARY

*Activity-Based Implementation and Evaluation Plan Summary
(Used as SETT Scaffold for Implementation and Evaluation Planning)*

Student's Name: _____ Date: _____

Planning/Implementation Team Members: _____

Area(s) of concern targeted for change: _____

STEPS	QUESTIONS	PLANS
1	Describe important, frequently occurring activities that provide embedded opportunities for the student to develop and use priority skills. <i>Include when, where, and with whom they take place.</i>	
2	Identify existing barriers that make the performance of the skills or participation in these activities difficult or impossible for the student.	
3	Identify assistive technology tools to be used (or tried) to remove barriers to performance and enhance the student's ability to develop targeted skills within the activities. <i>Provide viable options for performance.</i>	
4	Determine additional strategies, accommodations, or modifications which will be used to encourage the student's participation in the activity to be more active and powerful.	
5	Determine when and how tools and strategies will be used within the activity. <i>Under what conditions? When what happens?</i>	
6	Describe cues to be used to support student learning and success. <i>Include strategies for fading cues.</i>	
7	Describe the major area(s) of expected change (<i>Communication, participation, productivity</i>) and ways in which change is expected to occur. (<i>independence, rate, accuracy, quantity, frequency, spontaneity, duration, etc.</i>)	
8	Describe what successful participation in this activity or use of this skill "looks like" for this student in an observable, measurable way. <i>What is the minimum performance criterion for success?</i>	
9	What factors might undermine reaching success? <i>How will they be captured in the data?</i>	
10	Determine what, when how, and by whom data will be collected and analyzed for evidence of change? <i>What will it take to convince you and others that the student is making progress?</i>	
11	Under what conditions will this plan be modified if data indicates a need for modification? How and by whom will these decisions be made? <i>If change in the plan is indicated, is it in the tool(s), strategies, cues, skills, tasks, or other dimension?</i>	
12	Determine action steps. What will be done by whom? By when? Evidence?	

PURCHASE/SALE AGREEMENT FORM

Statement of Purpose for Agreement

The school districts and public agencies that are signatories to the agreement, hereinafter referred to as "the Parties," recognize the need for continued use of assistive technology devices that were originally purchased for individual students when the student moves from one school district to another or transitioning to other public agency service systems.

As a result, the parties hereby agree to the continued use of such devices by the student when the student changes school districts or transitions to other public agency service systems. Such continued use can be through one of the following methods: (a) by transfer or sale of the devices by the school district or agency to the student's new school district; (b) by the transfer or sale of the devices by the school district or agency to the student or the student's parents or legal guardians; or (c) by any other legal means that are acceptable to the student, and the parties to the agreement.

The parties further agree that in the event of a transfer or sale of assistive technology devices, they may use the "Agreement for the Purchase/Sale or Statement Declining the Sale of Assistive Technology Devices by Oklahoma School Districts and Public Agencies."

All transfers or sales of assistive technology devices will be made according to applicable state and federal law, rules, and regulations.

Section B

_____ declines to sell the assistive technology device(s)
school district or public agency

requested by _____
requesting school district, public agency, or parent/individual person

on _____ for the following reasons:

- The assistive technology device is currently being used by another child (children)(client(s)).
- The assistive technology device is a “general use” device and is not available for sale. It has been/is being modified for other children/clients.
- Other _____

signature of superintendent or authorized official of district or public agency

Date

SAMPLE DEPRECIATION SPREADSHEETS

Sample Device Depreciation Spreadsheets

Assistive Technology Device	Estimated Useful Life*	Device Age	Estimating Remaining Life	Original Purchase Price	Depreciation	Current Value
Alpha Smart Pro	5	2	3	\$279.00	\$111.60	\$167.40
Macintosh cable	7	2	5	\$10.00	\$2.86	\$7.14
downloading software	7	2	5	\$19.00	\$5.43	\$13.57
Carry case	7	2	5	\$25.00	\$7.14	\$17.86
TOTAL				\$333.00	\$127.03	\$205.97

*Note: Computers/AAC devices utilizing computer technology: 5 years.
Other types of devices: 7 years.

The Alpha Smart Pro is a word processing keyboard that the school purchased to implement a student's IEP writing objectives. The cable and software enable the student (or teacher) to upload information from the keyboard to computer or vice-versa.

The above example illustrates how the depreciation model works for this package of device when the device in question is 2 years old. The depreciation is figured by taking the original purchase price (\$279) and dividing it by the estimated useful life (5). The figure attained (\$55.80) is multiplied by the device age (2) and subtracted from the original purchase price (\$279.00). This figure will be the current value (\$167.40) for the remaining life. Spreadsheet examples that continue on the next page, age other device packages to provide an idea of how this process works for a range of devices.

Formula

Original Purchase Price	\$279.00		Original Purchase Price	\$279.00
Estimated Useful Life	() 5		Subtotal II	()111.60
Subtotal I	\$55.80		Current Value	\$167.40
Device age	(x) 2			
Subtotal II	\$111.60			

Assistive Technology Device	Estimated Useful Life*	Device Age	Estimating Remaining Life	Original Purchase Price	Depreciation	Current Value
Kenx (Morse Code)	5	2	3	\$780.00	\$312.00	\$468.00
Write Outloud	7	2	5	\$99.00	\$28.29	\$70.71
Spec Switch	7	2	5	\$42.00	\$12.00	\$30.00
Biggy curser	7	2	5	\$99.00	\$28.29	\$70.71
Track Pad	7	2	5	\$99.00	\$28.29	\$70.71
TOTAL				\$1,119.00	\$408.87	\$710.13

*Note: Computers/AAC devices utilizing computer technology: 5 years.
Other types of devices: 7 years.

Assistive Technology Device	Estimated Useful Life*	Device Age	Estimating Remaining Life	Original Purchase Price	Depreciation	Current Value
Tactile/texture-based symbols	7	2	5	\$15.00	\$4.29	\$10.71
One-step communicator (2)	7	2	5	\$200.00	\$57.14	\$142.86
Tactile symbols mounted on switch caps (10)	7	2	5	\$50.00	\$14.29	\$35.71
Power Link	7	2	5	\$180.00	\$51.42	\$128.57
Switch	7	2	5	\$42.00	\$12.00	\$30.00
Switch Interface	7	2	5	\$135.00	\$38.57	\$96.43
TOTAL				\$622.00	\$177.72	\$444.28
