Curotto-Can Commercial Gripper

The **Curotto-Can**
The Future of Automated Collection

Leverage your investment in a commercial front loader by adding the cost-saving Curotto-Can Commercial Gripper system.

The Curotto-Can Commercial Gripper enables a commercial front loader to grab, lift, and empty 32- to 96-gallon wheeled carts using either outside- or inside-the-cab controls. It is specially designed to lift heavy carts, such as those filled with green waste, food waste, or recyclables like crushed glass.

Key Features

- Eliminates the need for a second truck to pick up wheeled carts, which minimizes route duplication and reduces operating costs
- Provides the best gripper system for heavy carts without damaging cart bar pockets
- Positive lock system prevents carts from being lost in the hopper
- Mounted lower and forward on the fork tube to eliminate interference issues and protect the top of the packer blade and canopy from damage due to collision
- Route-proven technology means reliable performance
- Tucks out of the way when not in use to enable collection of commercial containers
- Patent pending

The Commercial Gripper can be ordered pre-installed on your front loader directly from the body manufacturer. For units already in service, a retro-fit installation kit is available.

Curotto-Can Automated Carry Can

The **Curotto-Can**
The Future of Automated Collection

The **Curotto-Can Automated Carry Can** has the fastest load time of any automated system on the market and delivers a proven 25% to 30% productivity advantage over automated side loaders.

By using the robust reliability of a front loader, this carry can delivers game-changing performance that will enable you to service more customers, more quickly, in more applications.

Key Features

- Fastest load time available — 4–5 seconds from wheel stop to wheel go
- 20% greater fuel efficiency due to less packing and idling
- Navigate cul-de-sacs up to 20% faster
- Eliminate cart loss and associated costs
- Eyes-forward operation reduces risks for repetitive stress injuries and enhances operator and public safety
- Reduce contamination rates to less than 5%
- Larger payload means fewer trips to the landfill or recycling center
- Load bulk material and eliminate the need for a chase truck
- Convert any commercial front loader to a residential collection unit in minutes
