Armed Security Officer

ERI Job Title: Armed Security Officer

Job Description

Overview

- Responds to unusual or emergency situations, such as theft, vandalism, terrorism, fire, medical emergency, and illegal activities, at a client's site using the appropriate escalation of force up to and including armed response.
- Guards and protects industrial, commercial, and private property against intentional harm; and observes and reports suspicious activities and incidents, providing for the security and safety of client property and personnel.
- Controls access to client site or facility through the admittance process, checks personnel for proper identification and clearance, permits authorized people to enter property, and prohibits unauthorized access to facilities.

Typical Functions

- Preserves order and enforced security regulations and directives for the site pertaining to personnel, visitors, and premises.
- Maintains proficiency in the use of protective equipment, restraint devices, and weapons.
- Warns violators of rule infractions, such as carrying forbidden articles, and apprehends or expels culprits.
- Sounds alarm or calls police or fire department by telephone in case of fire, difficulty with unauthorized people, or medical emergencies.
- Prepares logs and reports as required.

Methodology

Data Collection

ERI gathers data from 3 types of sources: surveys we conduct ourselves, surveys we purchase from other organizations, and reports from publicly traded organization, such as proxies and 10- Ks.

Data Verification

After collecting the data, we conduct QA to ensure the data flowing into the analyses are of the highest quality.

Some examples of QA tasks are job matching by trained analysts, interviewing participants to double-check data that do not fall into parameters, and inspecting data to identify issues such as keying errors or misclassifications.

Analysis

ERI conducts advanced analytics to accurately capture the full scope of an occupation and how it exists in the economy.

ERI is committed to using the best analysis for a given statistical task, including machine learning, meta-analysis, and regression.

These analyses have been validated against independently collected market data.

Quality Assurance

ERI analysts double-check the results for every job every quarter.

This process allows us to be confident in the data we publish.

ERI Results

The end result is a carefully curated dataset that reflects compensation rates with an unparalleled level of accuracy.

ERI provides a comprehensive database of compensation for over 11,500 job titles, 1,000 industries, and 11,000 locations.
