

## **Regional Draft Epidemiological Profile Data Summary Instruction Sheet**

RPCs shall develop a draft epidemiological profile data summary for their respective region utilizing the format provided below and submit it by December 31, 2011. Each draft epidemiological profile data summary must include background demographic information as well as consequence and consumption data for alcohol, non-medical use of prescription drugs, and illicit drugs. This data summary is the foundation for completing the comprehensive epidemiological profile which is due in March 2012. The data you will provide in the tables will assist you in completing the comprehensive profile in a more efficient manner and will be less time consuming.

- Complete the demographic data listed below utilizing census data and the tables below with consequence and consumption data that has been collected for each county in the Region. Replace the generic county label with the appropriate name for each county in the region. If the Region does not need all the county data lines provided please put "NA" in the appropriate blank.
- Include any supplemental data, tables, or graphs in the supplemental data findings section.
- Summarize the epidemiological findings for the Region in the Summary section. Highlight any specific areas of interest or counties which present a higher or lower value compared to other counties.
