MONTHLY INVESTMENT
PERFORMANCE REPORT

FEBRUARY 2009

SCOTT MEACHAM
OKLAHOMA STATE TREASURER

March 9, 2009

To the People of Oklahoma:

I am pleased to issue the February monthly investment performance report for the Office of the State Treasurer. I trust you will find it thorough and in keeping with my commitment to provide full and complete disclosure of all activities within my office. As always, my staff and I are available to answer any questions you might have.

Market Conditions

Yields on U.S. Treasury securities continued to increase in February. The yield on the benchmark 10-year note rose 29 basis points for the month closing at 3.013%. The difference in yield, or spread, between the two-year and 10-year notes rose 14 basis points to 2.05%, the steepest the yield curve has been since November 24, 2008. The difference between rates on 10-year notes and Treasury Inflation Protected Securities (TIPS), which reflects the outlook among traders for consumer prices, was 99 basis points, compared with 137 basis points on February 9th. The spread has averaged 225 basis points for the past five years. The Dow Jones Industrial Average finished the month at 7,062, 50% below its 2007 record and at its lowest level since May 1997. U.S. Federal Reserve Chairman Ben Bernanke presented a Report on the Economy and Fed Policy to the Senate Banking Committee on February 24, 2009. He issued a warning that economic revival hinges on policymaker's ability to break the "destructive power" of the deeply intertwined twin crises in banking and the broader economy.

Economic Developments

The Institute for Supply Management reported that its index of manufacturing activity was 35.6 for January, an increase over 32.4 reported in December. The unemployment rate for January climbed to 7.6% from 7.2% in December. The economy lost 3.6 million jobs since the recession started in December 2007, half of those losses in the three months preceding February. The consumer price index (CPI) rose 0.3% in January on a seasonally adjusted basis. This is the first advance on a monthly basis in six months. The core CPI was up 0.2%, slightly higher than expected. Energy prices rose 1.7% in January, but plunged 20.4% over the last 12 months. Gasoline prices rose 6%. The Commerce Department reported the U.S. trade deficit narrowed by a seasonally adjusted 4% to \$39.9 billion in December. This is the smallest monthly deficit in almost six years. The Conference Board's consumer confidence index fell in February to its lowest level in more than 41 years. February's number was 25.0 compared to 37.7 in January. Gross domestic product (GDP) declined at a 6.2% annual rate in the fourth quarter of 2008. This represents the steepest drop off since the depths of the 1982 recession. Existing home sales fell 5.3% in January. Inventories of previously owned homes fell 2.7% at the end of January. That represented a 9.6 month supply at the current sales pace. About 45% of total existing home sales involve sales of distressed property, including foreclosures.

Portfolio Commentary: Performance, Diversification, and Strategy

Yield on the Treasurer's portfolio was 3.89% in February and the weighted average maturity was 455 days. With regard to weightings, funds were shifted out of overnight investments and into U.S. government sponsored enterprises and Mortgage-backed securities as buying opportunities became available. The year-to-date monthly average investable base was \$3.970 billion. Portfolio diversification continues to be sound. U.S. Treasuries represented 9% of holdings, and U.S. government sponsored enterprises accounted for approximately 42%. Mortgage-backed securities were 19%, Municipal bonds were 1% and Certificates of Deposit represented 7% of assets. Money market mutual funds were 8%, and 10% was maintained in overnight repurchase agreements. Link deposits (at less than 1%), State Bond Issues (at 2%) and foreign bonds (at less than 1%) made up the balance of funds invested. In keeping with the State's statutory investment objectives, the portfolio strategy continues to seek safety, liquidity, and return on investment, in that order. Based on market conditions, portfolio strategy will consist of a combination of laddered maturities and market observation for investment opportunities.

Collateralization

All funds under the control of this office requiring collateralization were so secured at rates ranging from 102% to 110%, depending on the type of investment.

Payments, Fees, and Commissions

All securities were purchased or sold on a net basis utilizing competitive bidding where practicable, with no additional fees or commissions known to the State Treasurer. Bank fees, mutual fund operating expenses and fees charged by JPMorgan Chase for the Tri-Party Repurchase Agreement Program are detailed in the attached pages, as is the earnings split between the Treasurer and the master custodian bank on securities lending income.

Sincerely,

SCOTT MEACHAM, STATE TREASURER
SECRETARY OF FINANCE AND REVENUE

Explanation of Performance Comparison February 28, 2009

The following page presents market rates of return on the Securities portion of the General Account and of the State's aggregated State Agency Accounts. The figures, which are dollar- and time-weighted, where appropriate, are calculated using the percentage change in market value (inclusive of accrued income) from the end of the prior month to the end of the reporting month. To ensure the integrity of the data, this information is provided by the Treasurer's custodian bank acting in its capacity as an external third party. As such, performance measurement is presently confined to those investments which are custodied at Northern Trust ("Northern").

The Treasurer's office is trying to develop a method to report rates of return on all investment instruments in the State's portfolio. This is in an effort to report return data in a manner recommended on September 15, 1994, by the Working Group of the Cash Management and Investment Oversight Commission. However, there are technical and conceptual challenges to expanding performance measurement to other portions of the portfolio. Attempting to apply market-base pricing calculations to instruments which do not trade, such as Certificates of Deposit, presents difficulty which is both conceptual and technical in nature.

Benchmark data is also provided on the following page.
